Subject: Integrated Overflow Abatement Plan (IOAP)  
Public Input Meeting January 24, 2012  
Response to comments

Dear [REDACTED]

Thank you for taking the time to attend the meeting and submit your comments relative to I-64 & Grinstead Drive storage basin project. Your comment is summarized below, and your comment form is attached for reference.

Comment – How are we going to compensate in the floodplain for sewer basins?

Response to comment –MSD must adhere to regulatory requirements. If the project requires fill to be placed in the floodplain, or an above-grade structure to be constructed in the floodplain, compensation will be required onsite at a 1:1 ratio. If this requirement cannot be met on site then mitigation will be required within the watershed. Until the design is near completion, the amount of compensation and/or mitigation required cannot be determined.

This letter will be posted on MSD's Project WIN web page at the link [www.msdlouky.org/projectwin](http://www.msdlouky.org/projectwin).

Sincerely,

Steve Emly, PE  
Interim Director of Engineering
