This permit has been issued under the provisions of KRS Chapter 224 and regulations promulgated pursuant thereto. Issuance of this permit does not relieve the permittee from the responsibility of obtaining any other permits or licenses required by this Cabinet and other state, federal, and local agencies.

It is the responsibility of the permittee to demonstrate compliance with permit parameter limitations by utilization of sufficiently sensitive analytical methods.

SPECIAL POTW REQUIREMENTS

NOTE: The following requirements apply only to Publicly-Owned Treatment Works.

Requirements will be imposed, as applicable, governing the disposal of sewage sludge in accordance with 401 KAR Chapters 30, 47, and 48.

2. Industrial Pretreatment Standards

- a. The permittee shall provide annual reports to the Permit Issuing Authority listing industrial users of the system and identifying any problems caused by these users. Yearly reports are due no later than December 31 of each year, unless otherwise specified by the permitting authority.
- b. The permittee may be required to develop a local pretreatment program to enforce the requirement of applicable industrial discharges to meet the Federal Categorical Standards of 40 CFR Part 403, and other requirements pursuant to state regulation 401 KAR 5:057, Section 6.

3. Prohibitive Discharges

Under no circumstances shall the permittee allow discharge of the following into the system:

- a. Pollutants which create a fire or explosion hazard in the publicly owned treatment works (POTW);
- b. Pollutants which will cause corrosive structural damage to the POTW, but in no case, discharges with a pH lower than 5.0;
- c. Solid or viscous pollutants in amounts which will cause obstruction to the flow in sewers, or other interference with operation of the POTW;
- d. Any pollutant, including oxygen demanding pollutants (BOD₅, etc.), released in a discharge at such a volume or strength as to cause interference in the POTW;

- e. Heat in amounts which will inhibit biological activity in the POTW, but in no case, heat in such quantities that the influent to the sewage treatment works exceeds 104° F (40° C);
- f. Petroleum oil, nonbiodegradable cutting oil, or products of mineral oil origin in amounts that will cause interference or pass through;
- g. Pollutants which result in the presence of toxic gases, vapors, or fumes within the POTW in a quantity that may cause acute worker health and safety problems; and,
- h. Any trucked or hauled waste, except at discharge points designated by the POTW.
