Subject: Quarterly Report 40  
Civil Action No. 3:08-cv-00608-CRS

Attention Chief:

Please find attached our Quarterly Report, prepared in accordance with Paragraph 29 of our Amended Consent Decree. This report is for the period July 1, 2015 – September 30, 2015, pertaining to Consent Decree compliance activities. Included are sections on Project WIN activities related to: NMC, SORP, Discharge Abatement Plans, Public Outreach, Education, Notification and Participation, CMOM and Performance Overview.

I certify under penalty of law that this document and all attachments were prepared under our direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering such information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

If you have questions or need additional information, please contact me at (502) 540-6136.

Sincerely,

Angela Akridge, PE.  
Chief Engineer and MSD Engineering Director

## INTRODUCTION

The Louisville and Jefferson County Metropolitan Sewer District (MSD) is currently under an Amended Consent Decree with the Kentucky Department of Environmental Protection (KDEP), the United States Environmental Protection Agency (EPA), and the United States Department of Justice. The Amended Consent Decree was signed by United States District Judge Simpson on April 10, 2009, and filed in United States District Court, Western Division of Kentucky, Louisville Division, on April 15, 2009.

### Quarterly Reporting Period

This is the fortieth Quarterly Report submitted in accordance with Paragraph 29 of the Amended Consent Decree. This report covers the time period from July 1, 2015, through September 30, 2015. **The structure for this report is outlined as follows:**

**Section 1: Program Activities for Nine Minimum Controls (NMC)** - This section describes the data collected for NMC 2 – Maximization of Storage in the Collection System, and NMC 4 – Maximization of Flow at the Morris Forman Water Quality Treatment Center (WQTC) that were active during the reporting period (July 1, 2015, through September 30, 2015).

**Section 2: Program Activities for Sewer Overflow Response Protocol (SORP)** - This section describes the training attendance records, overflow data, and overflow reconnaissance inspection routes related to SORP that were active during the reporting period (July 1, 2015, through September 30, 2015).

**Section 3: Program Activities for Discharge Abatement Plans (DAP)** - This section describes the schedule and status for projects related to the DAP by means of an updated Gantt chart for active DAP projects during the reporting period, and the anticipated projects and activities that are scheduled for continued compliance with the Amended Consent Decree.

**Section 4: Program Activities for Public Outreach, Education, Notification and Participation** - This section describes the activities related to public outreach that were active during the reporting period (July 1, 2015, through September 30, 2015).

**Section 5: Capacity Management, Operations and Maintenance Report** - The CMOM program activities and programmatic activities for WQTCs generating capital projects will be reported in a Gantt chart for the reporting period (July 1, 2015, through September 30, 2015), and include the schedule for activities planned for the next two reporting periods (October 1, 2015, through March 31, 2016), are included in this section for continued compliance with the Amended Consent Decree.

**Section 6: Performance Overview** - This section provides an accounting of unauthorized discharge occurrences from the separate sanitary sewer and combined sewer system and the estimated volumes of each. A discussion of the probable reductions in both unauthorized discharge points and the discharges from MSD's Combined Sewer Overflow (CSO) locations, identified in the Morris Forman Water Quality Treatment Center (WQTC) Kentucky Pollutant Discharge Elimination System (KPDES) permit, that are expected to result from MSD's projects and activities during the reporting period are also contained in this section.

Performance information on Jeffersontown WQTC blending events, bypasses at WQTCs, DMR information, and phosphorus monitoring at WQTCs is included in this section.

---

## SECTION 1: Program Activities for Nine Minimum Controls

### 1.1 Nine Minimum Controls Program Background

Per Paragraph 24.a. of the Amended Consent Decree, the Nine Minimum Controls (NMC) Compliance Report was initially submitted to EPA and KDEP on February 10, 2006. MSD received an approval letter, dated February 22, 2007, for the NMC Compliance Report. The approved NMC Compliance document can be viewed on the MSD Project WIN website <http://www.msprojectwin.org>. Highlights of the NMC program implementation over this reporting period are outlined below.

### 1.2 NMC 2: Maximization of Storage in the Collection System

MSD has continued operation of Phase 1 and Phase 2 of the Real Time Control system. During this reporting period, approximately 422.73 MG were stored in the system during rain events and routed to the Morris Forman Water Quality Treatment Center (WQTC) once the system was able to handle the flow. See the table at the end of this section for a detailed report.

The gates at SWOR2 have been placed in manual control due to what was diagnosed as a failure of the gate level sensors that are integral to the integration of this site in the RTC schema. The sensors were replaced in the last quarter of 2013, but the problem could not be resolved at that time due to the gate-closed proximity switches also being diagnosed as defective. A description of corrective action progress is included in the Section 1.3 activities associated with Morris Forman WQTC performance.

### 1.3 NMC 4: Maximization of Flow at the Morris Forman Water Quality Treatment Center (WQTC)

The following charts illustrate performance in maximizing flow to the Morris Forman WQTC. The top of the chart shows rainfall inches per day. The middle part of the chart shows Morris Forman WQTC effluent flow and secondary treatment flow. The difference between these is the secondary bypass flow. The bottom of the chart shows days with a CSO activation at the five CSOs in the vicinity of the Morris Forman WQTC (CSOs 015, 016, 191, 210, and 211). Note that the flow meter downstream from CSO 211 is known to be affected by backwater effects of the Ohio River and the ultrasonic signal is sometimes blocked by mist and condensation when air and sewage temperatures are significantly different, so CSO activations at CSO 211 are keyed to water levels upstream and downstream of the inflatable dam in the Main Diversion Structure. The other CSO activations are tied to flow measurement downstream of the respective CSOs. At times, “blips” representing very small volumes of overflow are indicated by flow meters even though an overflow cannot be verified by level measurements or other indicators. These blips are not reported as overflows, but are noted in the CSO monitoring data reported in Appendix B. There are occasions in which a communications failure with telemetry has led to short-term gaps in the data. In addition, indications of rainfall and CSO activations are shown on the day they happened, but are not aligned with the exact time, so the effluent flow graph (which is tied to actual time) may show peaks that are offset from the indicated rain or CSO events by as much as 24 hours.

On April 8, 2015, Morris Forman WQTC experienced a complete power outage. The staff spent the month of April restoring processes until at 12:28 PM, April 30, 2015, all dry weather

flow up to normal flow parameters was receiving secondary treatment at MFWQTC. The impact from this outage continued into the third quarter of 2015 as the process had to withstand further outages for repairs to electrical, mechanical and control systems. Final Effluent Pump #2 continues to be out of service for repairs.

During this reporting period, there were a few outages that affected plant capacity in Primary Treatment. In the month of July, West Headworks Channel 1 and 3 were removed from service for repairs bringing the effective plant capacity to Morris Forman WQTC to 235 MGD. Rain events occurred during July causing overflows at CSO015, CSO016, CSO191, CSO210 and CSO211 after the influent exceeded the effective effluent capacity.

During the month of August, West Headworks Channel 3 was placed back in service while West Headworks Channel 1 remained out of service bringing the effective plant capacity to 300 MGD. There were a few high intensity rain events that occurred which produced high surges of flow at Morris Forman WQTC causing overflows at CSO015, CSO016 and CSO210.

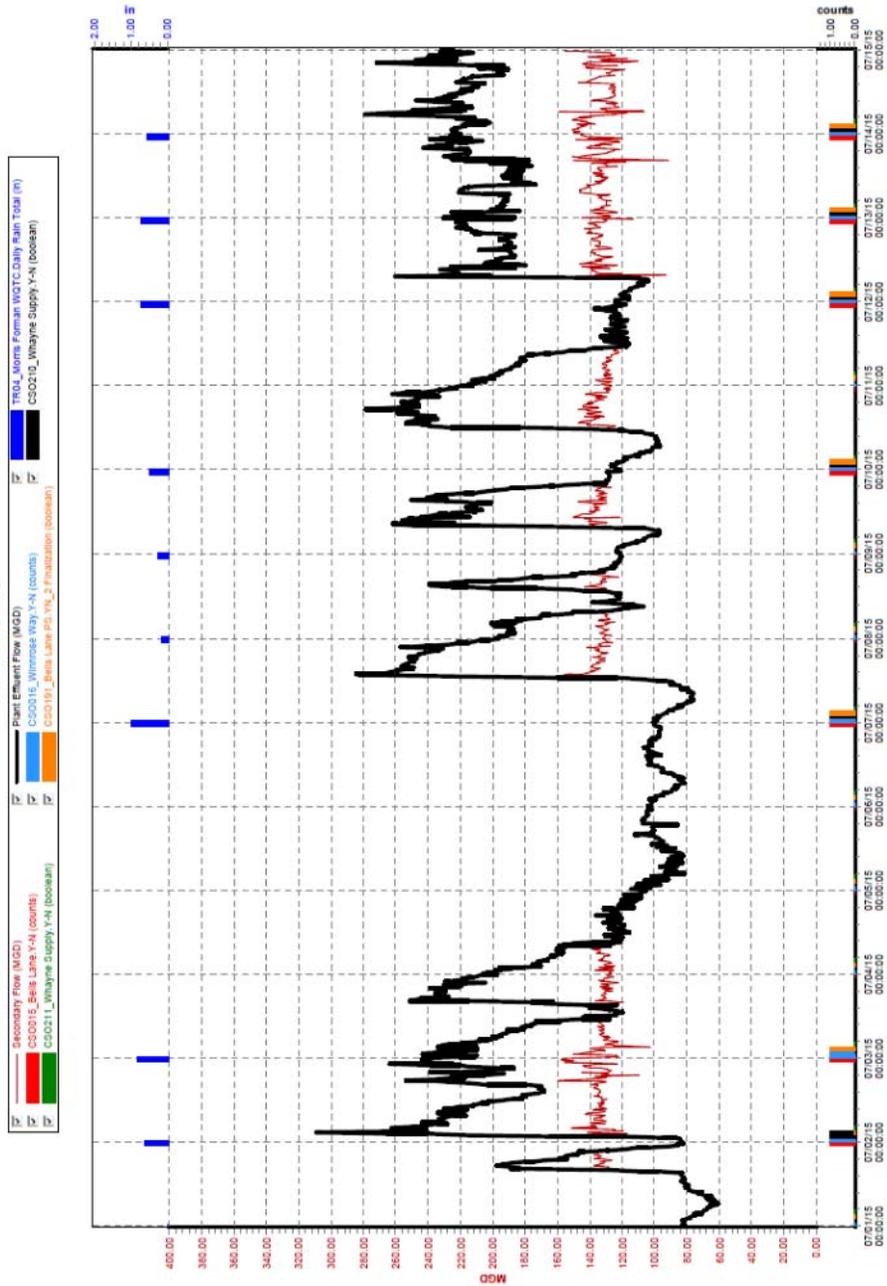

During the month of September, West Headworks Channel 1 remained out of service keeping the effective plant capacity at 300 MGD. The Southwestern Pump Station pumps combined storm flows of the separate system into Morris Forman Water Quality Treatment Center. The Southwestern Pump Station has been experiencing electrical issues with the effluent pumps. On September 30, 2015 the electrical issue disabled two pumps overwhelming the Southwestern Pump Station and caused an overflow to occur at CSO015. MSD staff was able to bring one of the disabled pumps back online shortly after both pumps failed.

There were also outages in Secondary Treatment for this period. Several secondary clarifiers were removed from service, repaired and placed back into service to return them to capacity. During rain events in this quarter, Morris Forman WQTC was able to maintain flows of 120 MGD to 140 MGD and above through the secondary treatment process.

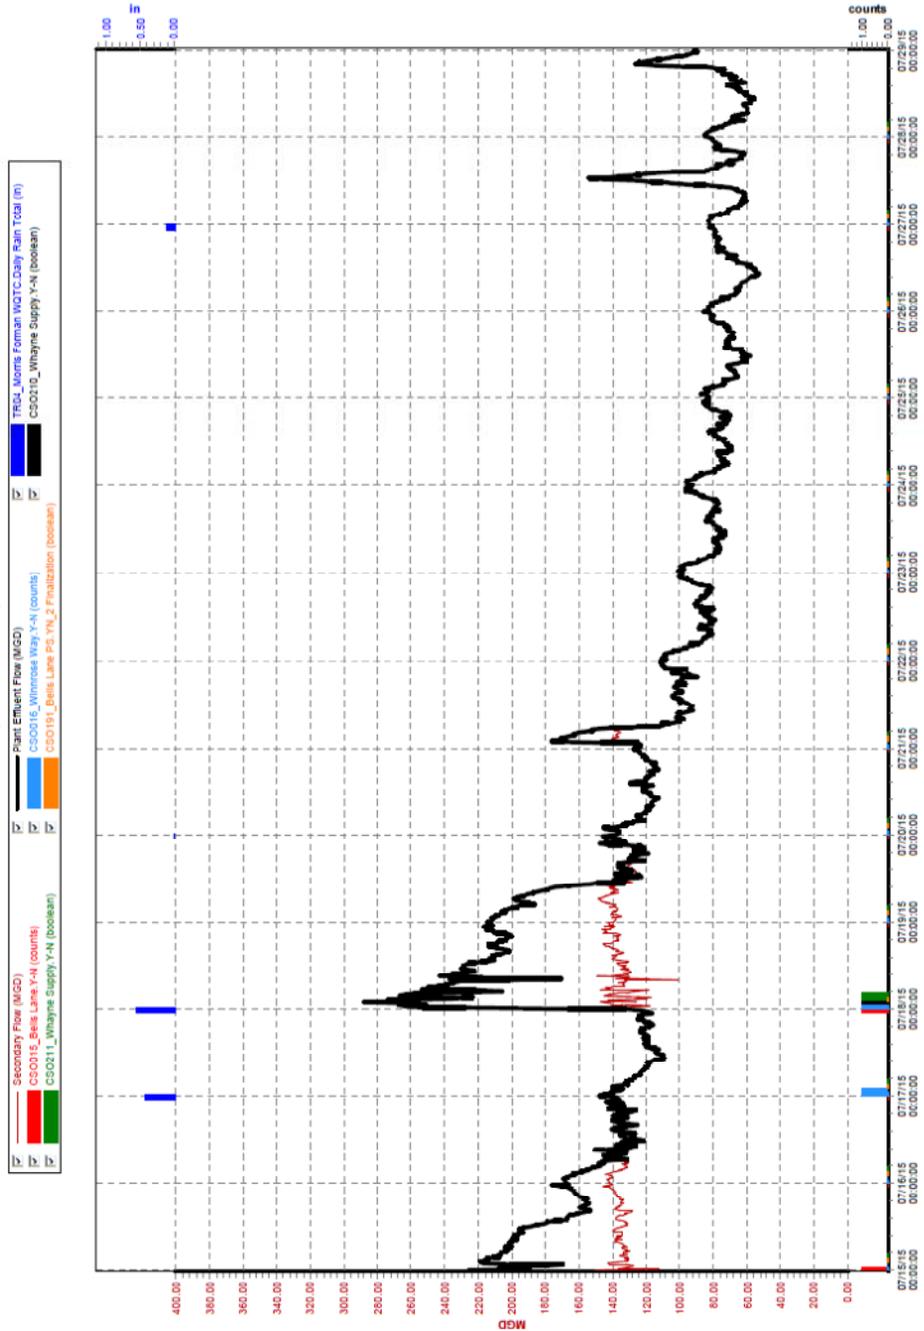

Solids processing was limited at times due to the biosolids dryer condition and capacity, and Morris Forman WQTC compensated by dewatering and landfilling biosolids to meet the solids processing requirements.

The Morris Forman Headworks Replacement Project has been bid and awarded with construction to begin 4th quarter 2015. The contractor has been on site taking final measurements for equipment replacement. The design for replacement of equipment at the Morris Forman WQTC High-Yard Substation is complete. The project was bid and awarded with construction anticipated to begin in the 4th quarter 2015. The Final Effluent Pump Station (FEPS) generator project has been awarded and is now under construction. A dewatering cake pump project and centrifuge backdrive controls project have been bid and are in the award process. Both projects will begin construction in the 4<sup>th</sup> quarter 2015. The construction of the SWOR 2 Modifications is complete. Project startup and testing occurred July 20, 2015.

 (09/09/15 to 09/23/15)

---

There was only one violation for this reporting period at Morris Forman WQTC. For the month of July a seven (7) day fecal coliform parameter was not met. There were no violations for the month of August and September 2015.

During this reporting period, the following activities were continued and/or completed:

- **RTC Integration** – Staff is working with the RTC consultant to review, revise and begin implementing the draft wet weather SOP for the system that also includes the Southeast Diversion Structure, Buechel Basin, Northern Ditch Diversion, and the Derek R Guthrie WQTC Wet Weather Treatment Facility. Full integration in an automated mode will not be achieved until the RTC software (CSoft) is upgraded to the most current version and the hydraulic engine is converted to use MSD's InfoWorks ICM hydraulic model. While this work is being done, the SOP is being implemented incrementally, starting with a period of manual operation to validate the control assumptions, followed by increasing levels of system automation as the automated controls for individual components are implemented, validated, and then incorporated into the overall RTC system. During this reporting period, MSD continued troubleshooting and revising the ICM model to achieve suitable run times and stability. Staff continued to review and revise SOPs for the Southeast Diversion Structure, Buechel Basin, Northern Ditch Diversion, and the Derek R Guthrie WQTC Wet Weather Treatment Facilities. During the next reporting period, MSD anticipates completing ICM model revisions to the InfoWorks ICM hydraulic model and begin upgrades to the latest version of Csoft. Staff began developing RTC process layer controls and SOPs for the Bells Lane campus, Logan and Breckenridge storage basin and CSO Interceptor, and upgraded Nightingale PS facilities. It is anticipated that the SOPs for the Southeast Diversion Structure, Buechel Basin, Northern Ditch Diversion, and the Derek R Guthrie WQTC Wet Weather Treatment Facility will be finalized by the end of 2015. Full implementation of the revised SOPs will be completed after the CSoft and InfoWorks ICM hydraulic model integration is complete and as new or upgraded facilities are brought into service. The anticipated completion date for full deployment of the latest version of Csoft utilizing the integrated ICM model is summer 2016.
- **RTC Performance Assessment** – The main objective of the RTC Performance Assessment is to determine whether the available flow and storage capacities within the system are being utilized to their full potential. MSD staff continued to review and prioritize for implementation strategies for performance improvement. During the next reporting period, MSD staff and the RTC consultant will continue to work to implement the hardware, software and set-point changes as applicable on a site-by-site basis. Work on implementing these improvements will continue through the next reporting period.

## SECTION 2: Program Activities for Sewer Overflow Response Protocol

### 2.1 SORP Program Background

Per Paragraph 24.d. of the Amended Consent Decree, MSD initially submitted the Sewer Overflow Response Protocol (SORP) to EPA and KDEP on February 10, 2006, and received comments on March 13, 2006.

MSD completely revised the SORP documentation in 2011. The draft of this revised document was submitted for comment on August 22, 2011. Comments from the EPA and KDEP were received and addressed, and the document was resubmitted October 28, 2011. Final approval of the updated SORP document was received February 21, 2012. A hard copy of the approved document has been distributed to each division throughout MSD and a viewable, downloadable electronic version has been posted to the MSD Project WIN website [www.msprojectwin.org](http://www.msprojectwin.org).

The current approved SORP document is dated February 21, 2012, and can be viewed on the MSD Project WIN website ([www.msprojectwin.org](http://www.msprojectwin.org)). Updates to the SORP document were submitted in August 2012, with confirmation of approvals on October 25, 2012. These updates are posted on the Project WIN website. The following activities were performed during this reporting period.

### 2.2 Overflow Management and Field Documentation

- Monitored approximately 149 sanitary sewer overflow (SSO) sites, which have been grouped into routes based on the range of rainfall rates necessary to cause a SSO. These routes are monitored during rain events depending on the magnitude and location of the storm. If an overflow is observed, a Discharge Work Order is created to document the event. During this quarter, Engineering staff documented 86 unauthorized discharges through route reconnaissance. Inspection routes were run during rain events as described in the following table:

Route Description	07/03/2015	07/07/2015	07/10/2015	07/12/2015	07/13/2015	07/14/2015	07/18/2015	08/06/2015	08/19/2015
ENGINEERING RAIN EVENT SSO INSPECTION ROUTE		X		X		X			
RS JEFFERSONTOWN RAIN EVENT SSO INSPECTION ROUTE (JTOWN MANHOLES WITHIN 2000 LF OF HEADWORKS)	X		X	X			X	X	X
RS JEFFERSONTOWN/FERN CREEK RAIN EVENT SSO INSPECTION ROUTE	X		X	X			X	X	X
RS MIDDLE/MUDDY FORK RAIN EVENT SSO INSPECTION ROUTE	X		X	X	X	X	X	X	X
RS HIKES POINT RAIN EVENT SSO INSPECTION ROUTE	X		X	X			X	X	X

- Due to capacity-related issues during this reporting period, MSD Operations staff hauled 127,500 gallons of sewage. MSD also hauled due to other issues as indicated in the following table:

MSD Hauled Volumes In Gallons (July 1, 2015 - September 30, 2015)				
Problem	April	May	June	Total
LACK OF SYSTEM CAPACITY	123,900	3,600	-	127,500
ELECTRICAL FAILURE	-	1	-	1
STRUCTURAL FAILURE	7,000	50	40,000	47,050
MECHANICAL FAILURE	-	-	36,000	36,000
<b>Grand Total</b>	<b>130,900</b>	<b>3,651</b>	<b>76,000</b>	<b>210,551</b>

### 2.3 Staff Training and Communication

- Reviewed and updated the training documentation for the 2015 third quarter SORP training that included Public Notification and Overflow Cleanup.
- Commenced planning for the 2015 fourth quarter SORP training that will focus on Completing the Overflow Reporting Form, Reporting Requirements and Data Entry.
- Conducted the following SORP Quarterly training sessions which were attended by 243 employees.

Staff Training Participation - July 1, 2015 - September 30, 2015				
Date	Dept./Area	Location	Module	Attendees
9/15/2015	Morris Foreman Staff	MFWQTC	Public Notification and Overflow Cleanup	10
9/16/2015	Morris Foreman Staff	MFWQTC	Public Notification and Overflow Cleanup	37
9/16/2015	Morris Foreman Staff	MFWQTC	Public Notification and Overflow Cleanup	13
9/17/2015	RMS/ENG Staff	CMF	Public Notification and Overflow Cleanup	32
9/18/2015	I&FP Staff	CMF	Public Notification and Overflow Cleanup	9
9/22/2015	Morris Foreman Staff	MFWQTC	Public Notification and Overflow Cleanup	4
9/23/2015	Morris Foreman Staff	MFWQTC	Public Notification and Overflow Cleanup	16
9/23/2015	Morris Foreman Staff	MFWQTC	Public Notification and Overflow Cleanup	4
9/24/2015	RMS/ENG Staff	CMF	Public Notification and Overflow Cleanup	56
9/25/2015	I&FP Staff	CMF	Public Notification and Overflow Cleanup	10
9/29/2015	West OPS/Collections	DRGWQTC	Public Notification and Overflow Cleanup	6
9/30/2015	Central OPS/Collections	CCWQTC	Public Notification and Overflow Cleanup	33
9/30/2015	East OPS/Collections	FFWQTC	Public Notification and Overflow Cleanup	13
<b>Total</b>				<b>243</b>

---

## SECTION 3: Program Activities for Discharge Abatement Plans

### 3.1 Integrated Overflow Abatement Plan (IOAP)

As a requirement of the Amended Consent Decree, per Paragraph 25, MSD is to prepare and submit for review and approval discharge abatement plans for the elimination of unauthorized discharges from the separate sanitary sewer system and the combined sewer system, the reduction and control of discharges from the CSO locations identified in the Morris Forman WQTC KPDES permit, and the improvement of water quality in the receiving waters.

The Final Sanitary Sewer Discharge Plan and the Final CSO Long Term Control Plan were submitted concurrently and certified on December 19, 2008, under the title of the Integrated Overflow Abatement Plan (IOAP). The IOAP was accepted by the Federal Court and incorporated by reference into the Amended Consent Decree by an Order signed February 12, 2010, that was entered into public record February 15, 2010.

MSD submitted an IOAP modification request to EPA/KDEP on September 20, 2012, with partial approval granted via certified letter on October 25, 2012. The modified project package, including program descriptions, progress, and updated supporting text, was submitted to EPA/KDEP for approval on June 14, 2013. On June 19, 2014, MSD received approval of the 2012 IOAP Modification from EPA/KDEP. The project and program modifications proposed within this submittal resulted from additional information gathered from ongoing system monitoring, hydraulic modeling, and best professional judgment. MSD's adaptive management approach to overflow abatement has justified modifications which will result in a higher level of overflow control to be completed faster than originally proposed for approximately the same overall budget.

### 3.2 Sanitary Sewer Discharge Plan (SSDP)

The Sanitary Sewer Discharge Plan (SSDP) addresses the overflows and unauthorized discharges from the separate sanitary sewer system. Three separate plans have been submitted under this program as described below and outlined in Paragraph 25.a. of the Amended Consent Decree.

#### 3.2.1 Updated Sanitary Sewer Overflow Plan Implementation

MSD prepared and submitted the Updated Sanitary Sewer Overflow Plan (SSOP) on February 10, 2006. This plan included an overview of the MSD sanitary sewer overflow abatement program and specific actions taken to reduce/eliminate overflows from the sanitary sewer system. This document included a list of the proposed improvements to be accomplished by December 31, 2008. Activities required under the Updated SSOP have been completed.

#### 3.2.2 Interim Sanitary Sewer Discharge Plan

MSD submitted an Interim Sanitary Sewer Discharge Plan (ISSDP) for approval on September 30, 2007. Comments were received on January 8, 2008. MSD resubmitted the revised ISSDP on March 7, 2008, and received an approval letter for the ISSDP on July 24, 2008. The approved ISSDP document can be viewed on the MSD Project WIN website ([www.msdpwin.org](http://www.msdpwin.org)).

All projects required by the ISSDP have been completed and certified, with the exception of the Derek R. Guthrie WQTC expansion. During this reporting period the Derek R. Guthrie WQTC was operational in accordance with information previously submitted. The facilities provided under the project have been brought on-line and operated in a manner that achieves the project's full intent – to eliminate local SSOs caused by plant capacity limitations and to provide secondary treatment to the wastewater received from the expanded wet weather service area resulting from eliminating the SSOs at the Southeast Diversion, the Highgate Springs Pump Station, and the Hikes Point area.

Currently, the entire project is not fully complete in accordance with the construction contract documents due to existing litigation with and performance by the general contractor. However, the full functionality and capacity of the plant upgrades under this project meets the demands of the service area. With this understanding, a revised certification letter will be submitted during the next reporting period.

### **3.2.3 Final Sanitary Sewer Discharge Plan**

MSD submitted for approval a Final Sanitary Sewer Discharge Plan (SSDP) on December 19, 2008, as Volume 3 of the Integrated Overflow Abatement Plan (IOAP). The IOAP was accepted by the Federal Court and incorporated by reference into the Amended Consent Decree by an Order signed February 12, 2010, that was entered into public record February 15, 2010. A revised SSDP was included in the IOAP revision, submitted June 14, 2013. On June 19, 2014, MSD received approval of the 2012 IOAP Modification from EPA/KDEP.

The following is a summary of activities that support elimination of the Prospect WQTCs.

- Project Status Details:
  - River Road Interceptor – project complete.
  - River Road Interceptor Phase 1A – project complete.
  - Harrods Creek Pump Station – project complete.
  - Harrods Creek Interceptor and Force Main Phase 1 – project complete.
  - Harrods Creek Interceptor and Force Main Phase 2 – project complete.
  - Harrods Creek Force Main Phase 3A – project complete.
  - Harrods Creek Force Main Phase 3B – project complete.
  - Shadow Wood WQTC Elimination – Flow diverted to Hite Creek WQTC 09/01/2015.
  - Hunting Creek North WQTC Elimination – Flow diverted to Hite Creek WQTC 08/31/2015.
  - Timberlake and Hunting Creek South WQTC Elimination – Timberlake flow diverted to Hite Creek WQTC 07/01/2015, Hunting Creek South flow diverted to Hite Creek WQTC 07/16/2015.
  - Ken Carla WQTC Elimination – Flow diverted to Hite Creek WQTC 09/02/2015.
  - Deep Creek PS Elimination – Bid Advertisement.

### **3.3 CSO Long Term Control Plan**

The CSO Long Term Control Plan (LTCP) addresses the overflows and unauthorized discharges from the CSS. Two separate plans have been submitted under this program as described below and outlined in Paragraph 25.b. of the Amended Consent Decree.

#### **3.3.1 Interim CSO Long Term Control Plan**

The Interim CSO LTCP was initially submitted to EPA and KDEP on February 10, 2006. MSD received an approval letter dated February 22, 2007, for the Interim LTCP. The approved Interim LTCP can be viewed on the MSD Project WIN website ([www.msdpjprojectwin.org](http://www.msdpjprojectwin.org)).

This plan includes an overview of the MSD program, efforts taken to reduce/eliminate discharges from the CSS and the list of proposed improvements to be accomplished by December 31, 2008. All projects associated with this plan have been completed.

#### **3.3.2 Final CSO Long Term Control Plan**

MSD submitted for approval the Final CSO LTCP on December 19, 2008, as Volume 2 of the Integrated Overflow Abatement Plan (IOAP). The IOAP was accepted by the Federal Court and incorporated by reference into the Amended Consent Decree by an Order signed February 12, 2010, that was entered into public record February 15, 2010. A revised LTCP was included in the IOAP revision, submitted June 14, 2013. On June 19, 2014, MSD received approval of the 2012 IOAP Modification from EPA/KDEP.

#### **3.3.3 Green Program Update**

MSD continued program activities to provide incentives to private property owners to reduce the amount of impervious surface that drains to the combined sewer system.

During the reporting period, MSD updated the green infrastructure website (<http://www.msddgreen.org>). Through this website, information on high profile projects, program activities, forms and documents outlining participation in incentive programs (green infrastructure, downspout disconnection, urban reforestation) is provided in an accessible format.

The green program incentives are being applied to reflect the values of green projects in CSO areas or regions based on the latest modeling results. This application ties incentives directly to overflow reductions in various CSO regions to promote green projects in the areas that provide the most value. Project opportunities are optimized to best use available funding and provide additional overflow volume reduction benefits to complement LTCP projects.

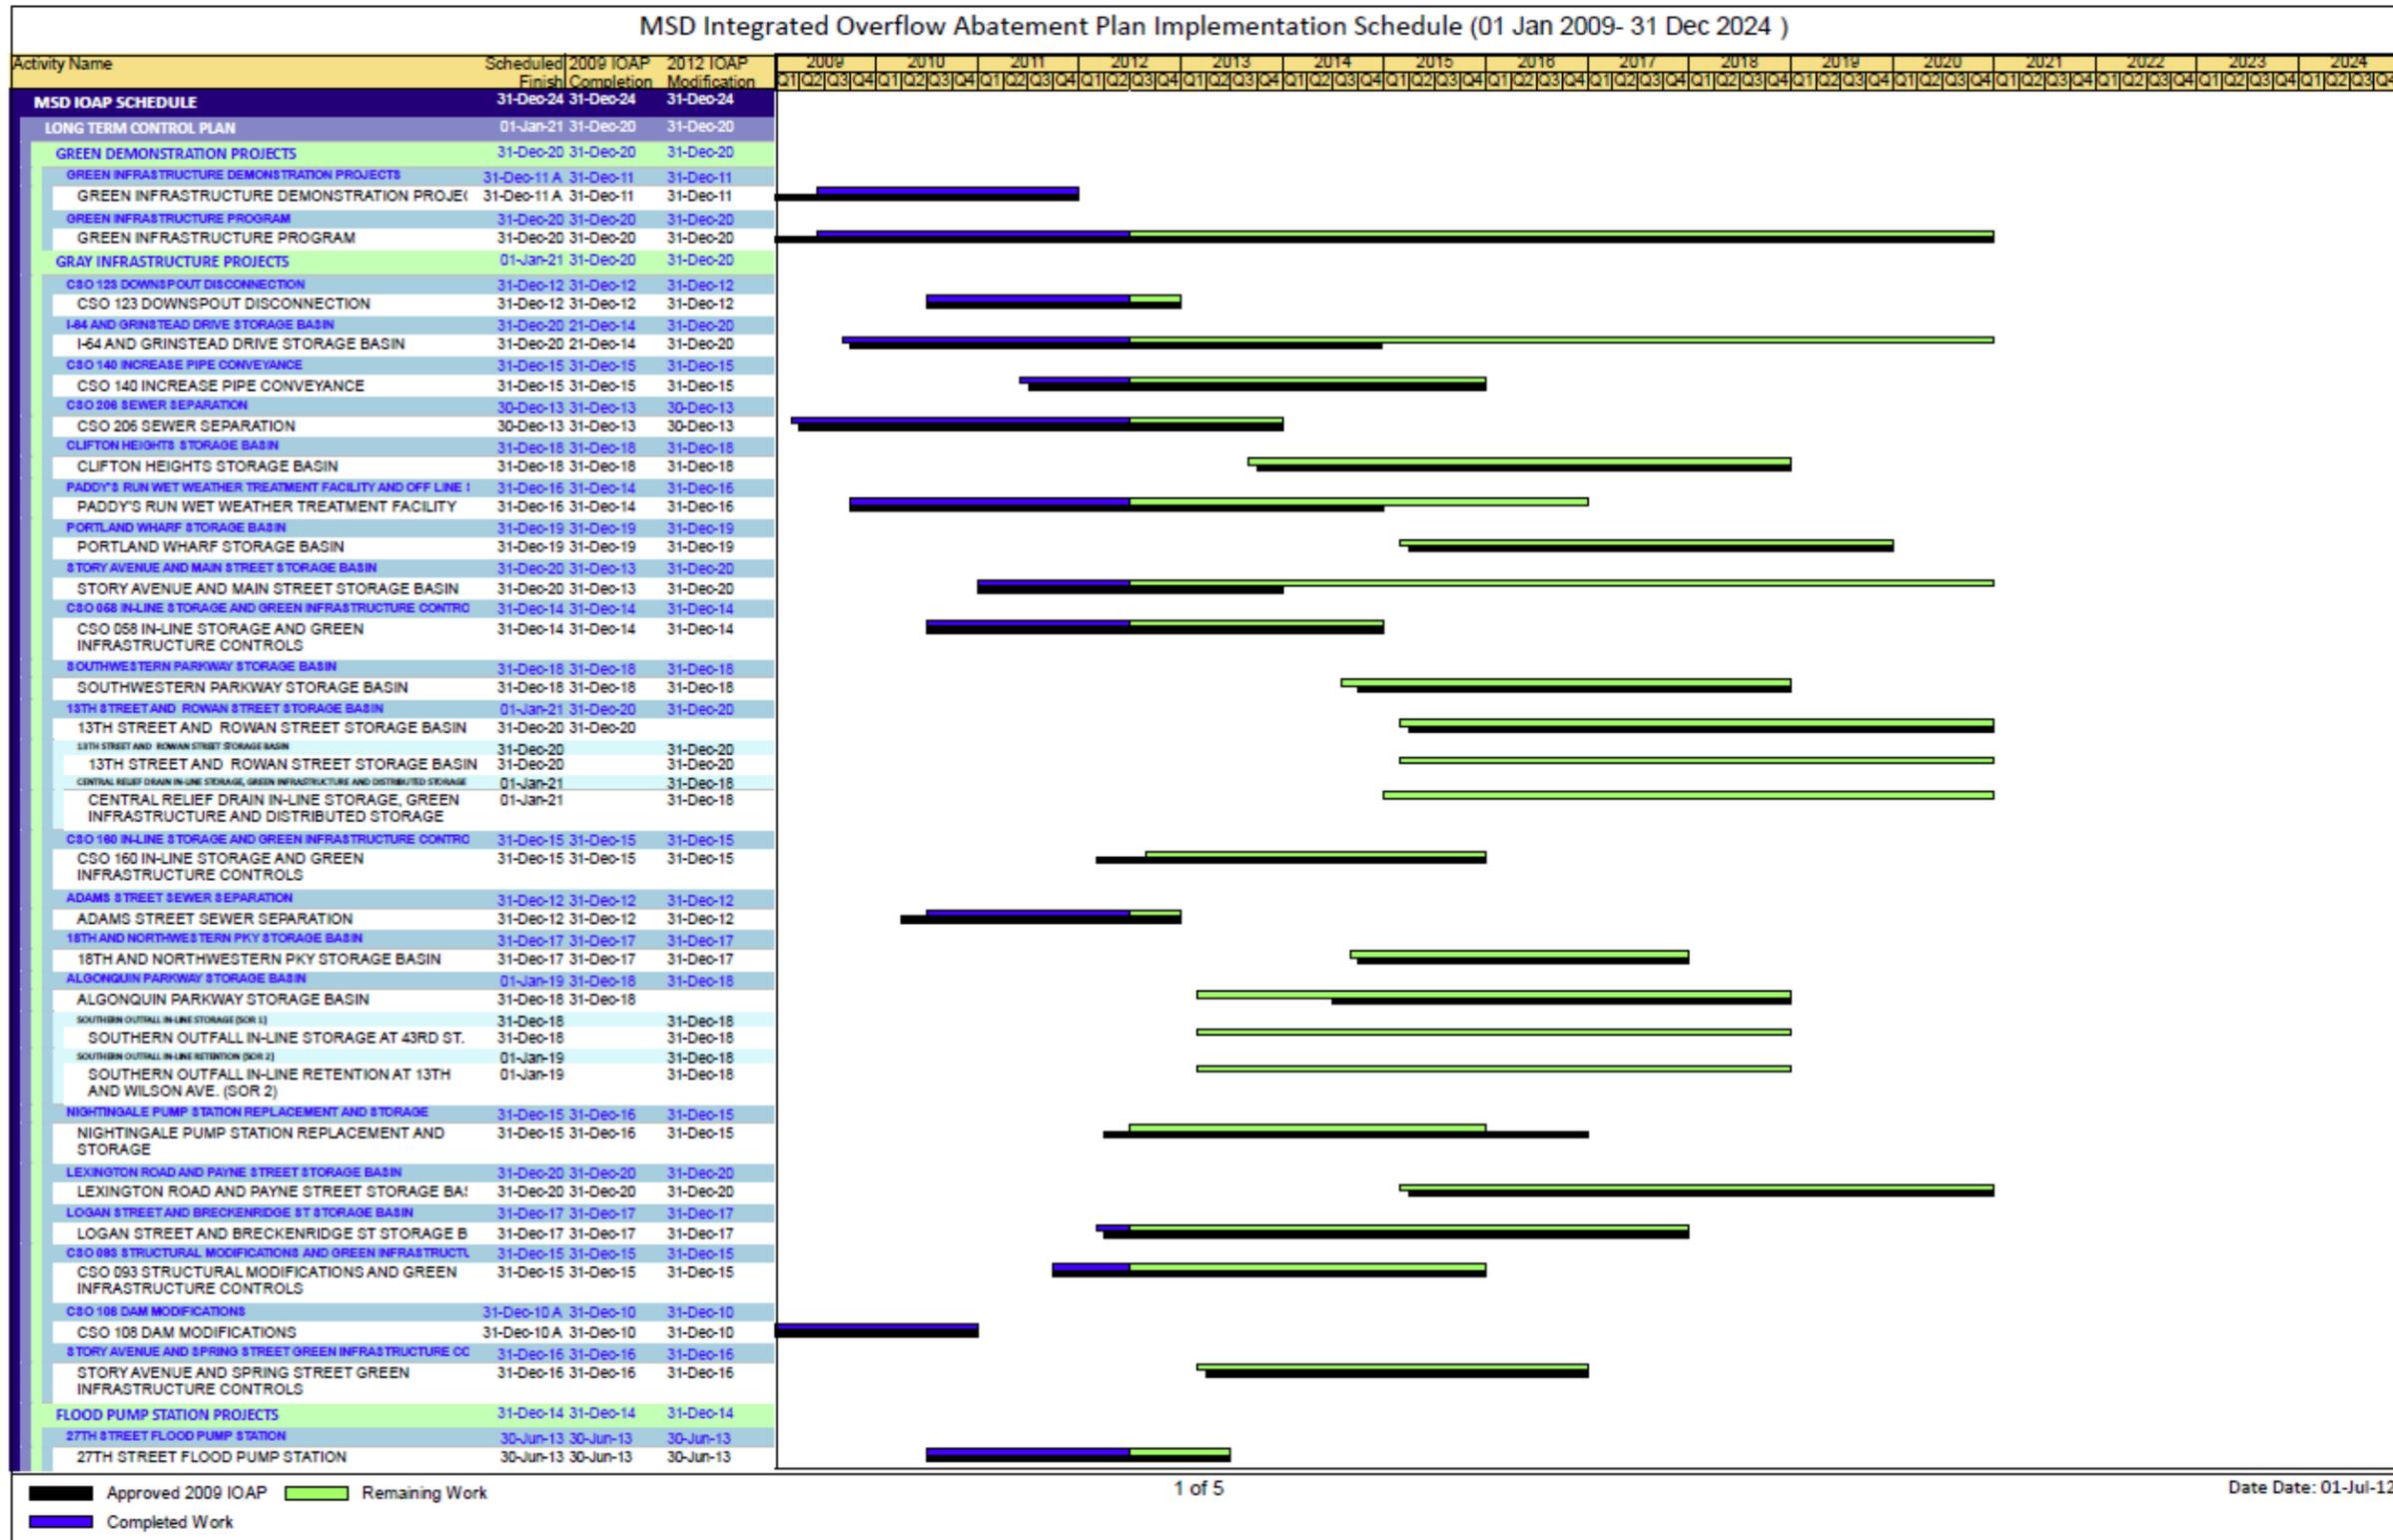

On September 22, 2015, MSD held the Construction Field Day. The Construction Field Day educates engineers, designers and developers on green infrastructure technologies, construction methods, design methods and regulatory updates. The 2015 event was held at the Louisville Water Tower, and focused on green infrastructure construction, erosion prevention and sediment control, proposed design requirement changes, and recent regulatory changes. The event included a live rain garden construction demonstration and a meet-and-greet opportunity with MSD's Executive Director.

MSD continues to administer an urban reforestation program to intercept rainwater and reduce stormwater entering the sewer system. Urban reforestation proposals require a Memorandum of Understanding for reporting tree location, condition, and maintenance plan. Partners participating in the program are responsible for ongoing maintenance of the trees.

Continued coordination with the green and MS4 program is on-going to optimize resources and regulations to improve water quality.

### **3.4 Activity Progress Chart**

A Gantt chart showing the previous and Proposed IOAP Modification schedules (Refer to IOAP, Volume 1 – Figure 6.3.1 for the previous) for the entire program is provided below.

## **SECTION 4: Program Activities for Public Outreach, Education, Notification and Participation**

### **4.1 Public Notification Program**

MSD has developed a program aimed at notifying the community of the objectives of Project WIN and how to lessen the risks associated with coming into contact with sewage overflows.

### **4.2 Public Education Programs**

MSD has developed a public education program aimed at disseminating information to the public on MSD's primary business functions with emphasis on wastewater, stormwater and flood protection. Efforts continued to utilize various media outlets, including television, radio, magazines, and newspapers to serve as a conduit for circulating information to the public.

During the reporting period, MetroTV aired programs detailing the IOAP Public Input Meetings. Additionally, MSD is in the process of creating water quality sampling videos and partnering with educational organizations to assist with watershed videos. These efforts will be underway in FY16 and ultimately available to the public.

### **4.3 Public Outreach Programs**

MSD has developed a public education program aimed at expanding the public's knowledge on MSD's primary business functions of wastewater, stormwater and flood protection, with an emphasis on Project WIN Program elements.

#### **4.3.1 IOAP Project and Program Meetings**

MSD facilitates meetings for the Wet Weather Team (WWT), and the public to review regulatory commitments, update progress on projects and initiatives, and to gather public input on efforts.

MSD has developed a partnership with Louisville Metro for providing project information and soliciting feedback from stakeholders using a Structured Public Involvement approach. Structured Public Involvement is meant to facilitate relevant input on the design process as MSD prepares to design and construct CSO basins. Our current IOAP outreach activities and public meetings are using this process to elicit qualitative and quantitative information and enhance our engagement with customers. The Structured Public Involvement approach assures anonymity for each participant using transceivers to compile data which can then be correlated on a customer-specific basis. The plan for Structured Public Involvement includes implementing a four-meeting process that leads stakeholders through the project Design Stages: Orientation, Concept, Advanced, and then a Pardon Our Dust meeting upon construction. Online surveys are also being made available to allow those not in attendance at public meetings to provide similar project-specific input. Creating this secondary online opportunity has been successful and generated responses that otherwise would not have been accounted for at the public meetings. Additional information regarding the Structured

---

Public Involvement Process and meetings held during this reporting period may be found at the Project WIN Public Input Website (<http://www.msdpwin.org/Public-Input.aspx>).

During the reporting period, MSD facilitated and planned for the following meetings:

- A Pardon Our Dust public meeting was held for the Lea Ann Way West Project on July 9, 2015. MSD staff explained the project plans, offered tips to the public, and provided a construction schedule.
- A Concept Design Stage public input meeting for the Clifton Heights Storage Basin project was held on September 15, 2015, at the American Printing House for the Blind. MSD staff discussed and provided general designs as well as gathered input using the Structured Public Involvement Process.
- The Wet Weather Team Stakeholder Meeting was held on August 11 and September 22, 2015, to provide updates on MSD's IOAP progress and activities to date, planned activities for 2015, and an update of activities for MSD's 20-year Comprehensive Facility Plan, including detailed presentations on the Stormwater and Wastewater Service Areas.

During the next reporting period, the following meetings are planned.

- A planned Conceptual Design input meeting to incorporate Structured Public Involvement for the Southwestern Parkway Storage Basin project is scheduled for November 12, 2015.
- Meet with the Wet Weather Team Stakeholder Meeting in December, 2015.
- Conduct a Pardon Our Dust Preconstruction Meeting on CSO190's Green Infrastructure Project Phase I.
- Conduct a Concept Design stage public meeting for Portland Storage Basin.
- Conduct an Orientation Public Meeting for the Lexington Road & Payne Street Storage Basin Project.

---

## SECTION 5: Capacity Management Operations and Maintenance Report

Per Paragraph 24.c of the Amended Consent Decree, the Capacity Management Operations and Maintenance (CMOM) Self Assessment Report was submitted to EPA and KDEP on February 10, 2006. MSD received a letter of approval on August 22, 2006. The approved CMOM document can be viewed on the MSD Project WIN website ([www.msprojectwin.org](http://www.msprojectwin.org)).

The primary objectives of CMOM are as follows:

**Capacity** – Ensuring that adequate wet and dry weather capacity is maintained in existing and new infrastructure.

**Management** – Implementing programs in support of operations and maintenance activities required to ensure KPDES permit compliance and promote public health by remedying design, construction and operational deficiencies; training staff; and performing activities in a safe manner.

**Operations** – Implementing written standard operating procedures to operate system components as designed to meet permit requirements.

**Maintenance** – Implementing systematic, comprehensive asset maintenance and rehabilitation programs to prevent overflows, maximize system reliability and ensure system sustainability.

Although the program implementation deadlines from the CMOM Self Assessment Report were previously met, MSD continued to enhance the activities listed below during this reporting period. Highlights of the CMOM program implementation over this reporting period are outlined below.

### 5.1 Management Programs

#### M-E-9 Infrastructure Rehabilitation

Activity details are provided in the CMOM schedule provided as **Section 5.4 – CMOM Activity Schedule**.

#### M-E-10 System Capacity Assurance Program

Included in the goals of the CMOM Self-Assessment Report, The System Capacity Assurance Plan (SCAP) is the basis for applying capacity decision criteria to support watershed community values. It provides a programmatic approach for confirming available capacity within MSD's sanitary sewer system, creating capacity credits through system improvement and rehabilitation, identifying hydraulic constrictions, and proposing capacity improvements that support interim and long-term performance objectives. SCAP revisions, including credit and balance projections and discussion of approach for multi-family residential unit populations were discussed with EPA and KDEP and submitted electronically for review on July 21, 2014. The final SCAP revision was submitted for approval on December 9, 2014 and approval was received February 5, 2015. A copy of the approved SCAP can be found on the Project WIN website ([www.msprojectwin.org](http://www.msprojectwin.org)).

A current copy of the SCAP Credit Balance is included as **Appendix D**.

---

## 5.2 Operations Programs

### **O-A-1 Pump Station Operations Programs (Routine Operating Programs)**

Activity details are provided in the CMOM schedule provided as **Section 5.4 – CMOM Activity Schedule**.

### **O-A-2 Pump Station Operations Programs (Emergency Operating Programs)**

Activity details are provided in the CMOM schedule provided as **Section 5.4 – CMOM Activity Schedule**.

## 5.3 Comprehensive Performance Evaluations and Composite Correction Plans (CPE/CCP)

Per requirements of MSD's 2009 Amended Consent Decree, MSD implemented a Comprehensive Performance Evaluation (CPE) and Composite Correction Plan (CCP) program for the District's water quality treatment centers (WQTCs). Although the IOAP CPE assessments defined specific WQTC improvements to be completed by December 31, 2011, MSD will continue to implement CPE/CCP activities as part of the District's CMOM Program. This section will list such activities per WQTC as they occur each reporting period and will be outlined below.

### 5.3.1 Hite Creek Water Quality Treatment Center

During this reporting period, the following Hite Creek WQTC activities occurred.

- Construction continued for the Hite Creek WQTC Hydraulic Improvements Project.
- MSD staff continued to work with the consultant to complete an alternative solids and tertiary filter replacement study.

During the next reporting period, the following Hite Creek WQTC activities are planned.

- Construction will continue on the Hite Creek WQTC Hydraulic Improvements Project. It is anticipated that all work will be complete late spring 2016.
- MSD staff will continue to work with the consultant to complete an alternative solids and tertiary filter replacement study.

Schedules for CPE/CCP related capital projects are provided in **Section 5.4 – CMOM Activity Schedule**.

### 5.3.2 Floyds Fork Water Quality Treatment Center

During this reporting period there were no activities to report for this facility.

Schedules for CPE/CCP related capital projects are provided in **Section 5.4 – CMOM Activity Schedule**.

### 5.3.3 Derek R. Guthrie Water Quality Treatment Center

During this reporting period, the following Derek R. Guthrie WQTC activities occurred.

- Construction began for the Secondary Clarifiers 1, 2 & 3 collection mechanism replacement project.

- Construction began for the removal and upgrade of Return Activated Sludge (RAS) Pumps 1 and 4, including replacement of pumps 1 through 4 variable frequency drives, and was put on hold in anticipation of the results of the DRG Facility Plan document.

During the next reporting period, the following Derek R. Guthrie WQTC activities are planned.

- The draft DRG Facility Plan document will be reviewed by MSD staff and draft KDOW submittal will occur.
- Repairs to the power system of the Wet Weather Pump Station so that the Wet Weather Pumps can be tested for compliance with specifications.
- Construction will continue on the replacement of the Secondary Clarifiers 1, 2, & 3 mechanisms.
- It is anticipated construction will begin for the removal and upgrade of Return Activated Sludge (RAS) Pumps 1 and 4, including replacement of pumps 1 through 4 variable frequency drives. This will be on hold in anticipation of the results of the Facilities Plan document.

Schedules for CPE/CCP related capital projects are provided in **Section 5.4 – CMOM Activity Schedule**.

#### 5.3.4 Cedar Creek Water Quality Treatment Center

During the 2<sup>nd</sup> quarter of 2015, MSD staff and Consultant completed a feasibility study of automation alternatives and tertiary filter replacement study. The studies have resulted in recommendations for improvements in phases. During this reporting period, design was completed for the first phase of the project which is for improvements to the ultraviolet (UV) gate. The UV gate will be under construction in the last quarter of 2015. Bids were opened for Cedar Creek Water Quality Treatment Center UV Gate project.

During the next reporting period, MSD expects to award the construction contract for Cedar Creek Water Quality Treatment Center UV Gate project. MSD also plans to advertise and open bids for Cedar Creek Water Quality Treatment Center Influent Pump Station Gate Repair and begin design of Cedar Creek Water Quality Treatment Center Influent Pump Station Variable Frequency Drive (VFD) project.

Schedules for CPE/CCP related capital projects are provided in **Section 5.4 – CMOM Activity Schedule**.

#### 5.3.5 Prospect Area Water Quality Treatment Center Updates

An elimination plan for the five WQTCs serving Prospect (Timberlake, Hunting Creek North, Hunting Creek South, Ken Carla, and Shadow Wood), was submitted to EPA and KDEP on March 31, 2009. Approval of this plan was received on September 24, 2009, and work is proceeding on the projects defined in the IOAP. See **Section 3 – Program Activities for Discharge Abatement Plans** for an update on the design and construction of the projects that make up the elimination plan for the Prospect Area WQTCs.

#### 5.3.5.1 Timberlake Water Quality Treatment Center

On July 7, 2015, the Timberlake WQTC was taken off line and decommissioned.

Schedules for CPE/CCP related capital projects are provided in **Section 5.4 – CMOM Activity Schedule**.

#### 5.3.5.2 Hunting Creek North Water Quality Treatment Center

On August 31, 2015, the Hunting Creek North WQTC being taken offline and decommissioned.

Schedules for CPE/CCP related capital projects are provided in **Section 5.4 – CMOM Activity Schedule**.

#### 5.3.5.3 Hunting Creek South Water Quality Treatment Center

On July 16, 2015, the Hunting Creek South WQTC was taken offline and decommissioned.

Schedules for CPE/CCP related capital projects are provided in **Section 5.4 – CMOM Activity Schedule**.

#### 5.3.5.4 Ken Carla Water Quality Treatment Center

On September 2, 2015, the Ken Carla Water Quality Treatment Center was taken offline and decommissioned.

Schedules for CPE/CCP related capital projects are provided in **Section 5.4 – CMOM Activity Schedule**.

#### 5.3.5.5 Shadow Wood Water Quality Treatment Center

On September 1, 2015, the Shadow Wood Water Quality Treatment Center was taken offline and decommissioned.

Schedules for CPE/CCP related capital projects are provided in **Section 5.4 – CMOM Activity Schedule**.

#### 5.3.6 Jeffersontown Water Quality Treatment Center

Schedules for CPE/CCP related capital projects are provided in **Section 5.4 – CMOM Activity Schedule**.

#### 5.3.7 Starview Water Quality Treatment Center

During this reporting period, MSD awarded the Middletown Sanitary Recapture Phase II Section C and Chenoweth Run Interceptor Section 1 project. During the next reporting period, construction will begin on the Middletown Sanitary Recapture Phase II Section C and Chenoweth Run Interceptor Section 1 project. The Starview WQTC is scheduled to be off-line prior to March 31, 2016.

Schedules for CPE/CCP related capital projects are provided in **Section 5.4 – CMOM Activity Schedule**.

### 5.3.8 Berrytown Water Quality Treatment Center

During this reporting period, construction continued for the Middletown Sanitary Recapture Phase II Section D and Chenoweth Run Interceptor Section 2 project. During the next reporting period, construction should be completed for the Middletown Sanitary Recapture Phase II Section D and Chenoweth Run Interceptor Section 2 project. MSD plans for completion in November 2015. The plant flows will be diverted to the Floyds Fork WQTC. The gravity portion of this project is approximately 25% of the total length of gravity line required to eliminate the Starview WQTC. The Berrytown WQTC is scheduled to be off-line prior to December 31, 2015.

Schedules for CPE/CCP related capital projects are provided in **Section 5.4 – CMOM Activity Schedule**.

### 5.3.9 Other Water Quality Treatment Centers

CMOM related capital projects will be provided in the schedule provided as **Section 5.4 – CMOM Activity Schedule**.

- McNeely Lake – The McNeely Lake Sanitary Sewer and Force Main project is complete. This gravity portion is approximately 75% of the total length of gravity line required to eliminate the McNeely Lake WQTC. A private developer has extended the remaining gravity sewer through a future residential development to within 600 feet of the McNeely Lake WQTC. The design of the interceptor that will serve to eliminate the McNeely Lake WQTC and the Brookbend Way PS is complete. MSD advertised, bid and awarded a construction contract for the decommissioning of the McNeely Lake WQTC and Brookbend PS. During the next reporting period, construction will continue for the decommissioning of the McNeely Lake WQTC and Brookbend PS. MSD anticipates completing the elimination of the McNeely Lake WQTC by December 31, 2015, but is dependent on the legal processes required to obtain rights of access to the parcel surrounding the McNeely Lake WQTC.
- Bancroft WQTC – The scope of this project has been modified from storage at Devondale PS to eliminating the Devondale PS as part of the IOAP and conveying flow to a 0.33 MGD Pump Station and a 0.25 MG Storage Basin at the Bancroft site. Construction continued as the completion of the excavation of basin is completed along with the gravity sewer and force main required by the project. During the next reporting period, MSD anticipates the installation of the rock anchors for the basin, and the construction of various structures and electrical work to commence. The Bancroft WQTC and Devondale Pump Station are scheduled to be off-line by spring 2016 well ahead of the IOAP December 2021 date.
- Middletown Industrial Park WQTC – MSD's Board approved the acquisition of the Middletown Industrial Park WQTC system on January 26, 2015. The City of Middletown will continue to operate and maintain the sewer system until December 31, 2015. It is anticipated that flow will be diverted and the WQTC will be offline by that date. At that time, MSD will take over full operations and maintenance of the system. MSD initiated a design project to eliminate the plant. A private developer was responsible for the Middletown Sanitary Recapture Phase I Project which constructed a portion of the Chenoweth Run Interceptor to eliminate the Starview and Berrytown plants. This interceptor will also

provide a gravity outlet for the Middletown Industrial Park WQTC. MSD completed the design to construct an approximately 800 linear foot collector line for the elimination. During the next reporting period, MSD expects construction to commence for the elimination of the Middletown Industrial Park WQTC. The Middletown Industrial Park WQTC is scheduled to be off-line by December 31, 2015.

#### **5.4 CMOM Activity Schedule**

CMOM capital project milestones for the period of July 1, 2015, through September 30, 2015, as well as a look-ahead for the period of October 1, 2015, through December 30, 2015, are provided in the schedule below.

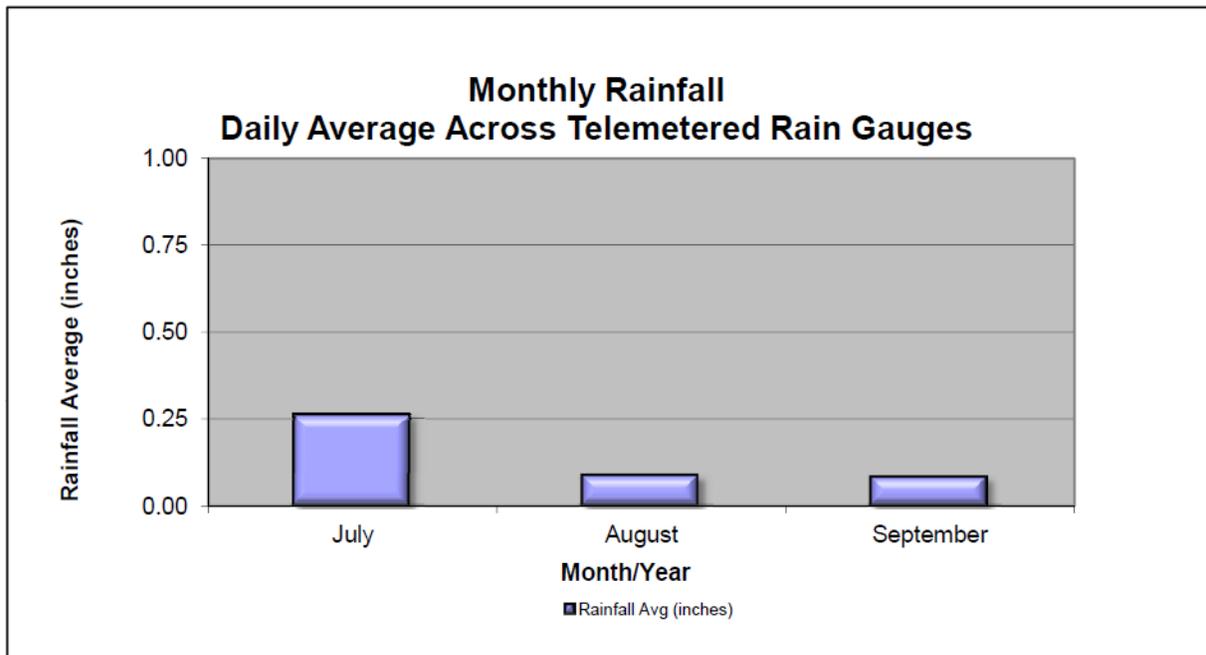

MSD CMOM FY14 Annual Commitments Schedule (01 April 2015 - 31 December 2015)					2015								
Activity ID	Activity Name	Physical % Complete	Start	Finish	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
<b>CMOM FY ANNUAL REPORT COMMITMENTS FINAL</b>													
<b>M-E-9 Infrastructure Rehabilitation</b>

## SECTION 6: Project WIN Performance Overview

### 6.1 Rainfall

The number and the volume of wet weather overflows are directly related to the amount of rain that has fallen during the reporting period. The following graph shows the Jefferson County average rainfall amounts for the last quarter. Data was pulled from MSD’s Rain Gauge Network.

A storm frequency analysis for CSOs is included as **Appendix B**.

### 6.2 Collection System Unauthorized Discharges

#### 6.2.1 Collection System Overflows to Waters of the United States (WUS)

MSD recorded information related to overflows reaching Waters of the United States (WUS) for the reporting period. This information is entered and maintained in Hansen utilizing procedures reviewed and improved through efforts associated with various components of the Amended Consent Decree. Details of these overflows will be included in the Annual Report for the period of July 1, 2015, through June 30, 2016, and will be posted on the Project WIN website. During this quarter, 152 unauthorized discharges to the Waters of the United States (WUS) have been reported.

Unauthorized Discharges (Waters of the United States) - July 1, 2015 - September 30, 2015			
Problem	Dry Weather	Wet Weather	Total
Blending at Jtown WQTC	0	6	6
Bypass at WQTC	2	6	8
Lack of System Capacity	0	131	131
Structural Failure	4	0	4
Pumped Overflow	0	2	2
Obstruction-Not Grease / Roots	1	0	1
<b>Total</b>	<b>7</b>	<b>145</b>	<b>152</b>

### July, August and September Weather Event Summary

According to the National Weather Service “July was a very active month, especially from July 7, 2015, through July 20, 2015 when many rounds of showers and storms crossed the region”. Most of the wet weather activity occurred in the middle of the month. On July 12, rain and thunderstorms caused numerous wet weather related overflows.

By comparison August and September were uneventful. Temperatures were unseasonably cool and the weather was dry with the exception of a thunderstorm and some minor precipitation in August and some precipitation at the end of September. There were no significant rain events and only one wet weather related overflow was recorded in August and one Blending event at J-town WQTC in September.

#### 6.2.2 Overflows to Ground (EXT)

MSD recorded information related to overflows to the ground that did not reach Waters of the United States for the reporting period. This information is entered and maintained in Hansen utilizing procedures reviewed and improved through efforts associated with various components of the Amended Consent Decree. These overflows will be included in the Annual Report for the period of July 1, 2015, through June 30, 2016.

#### 6.2.3 Overflows to Interior (INT)

MSD recorded information related to overflows to building interiors for the reporting period. This information is entered and maintained in Hansen utilizing procedures reviewed and improved through efforts associated with various components of the Amended Consent Decree. These overflows, that are the result of an issue in the main line, will be included in the Annual Report for the period of July 1, 2015, through June 30, 2016.

#### 6.2.4 Dry Weather CSOs

MSD recorded information related to dry weather overflows from permitted combined sewer overflow outfalls. This information is entered and maintained in Hansen utilizing procedures reviewed and improved through efforts associated with various components of the Amended Consent Decree. A detailed report of these overflows will be included in the Annual Report for the period of July 1, 2015, through June 30, 2016. The table below summarizes dry weather CSOs that occurred during the quarter. **Appendix A-1** includes details on the dry weather overflows that occurred in the quarter.

There was one dry weather overflow recorded at a CSO.

Dry Weather CSO - July 1, 2015 - September 30, 2015					
CSO	Type of Discharge	Date/Time	Problem	Cause	Volume (GAL)
CSO113	DISDW	9/14/15 8:15 AM	OBSTRUCTION-NOT GREASE / ROOTS	OBSTRUCTION IN MAIN SEWR	450

### 6.3 CSO Reductions

Included in **Appendix B** is the CSO data for this quarter. A summary of any data anomalies and the CSO data for each monitored overflow has been graphed along with rainfall information from the nearest rain gauge to facilitate review of the overflows that occurred.

- No CSO reduction projects were completed during the reporting period.

### 6.4 SSO Reductions

Estimation of SSO volume is not available in the same manner as it is for the CSO locations. The SSO volume reductions are estimates based on actual observations or from flow monitoring information.

- No SSO reduction projects were completed during the reporting period.

### 6.5 Gravity Line Preventive Maintenance

Each quarter, data and statistics relating to the cleaning, inspection, and maintenance of sewer assets performed under the Gravity Line Preventive Maintenance (GLPM) are reported. The following data was compiled for the period of July 1, 2015, through September 30, 2015. The first table includes data and targets. The second table includes unplanned maintenance and other maintenance activities that are performed in response to inspection.

Rolling Quarterly GLPM Performance With Targets							
	Oct-Dec	Jan-Mar	Apr-Jun	Jul-Sep	Total	Target/ qtr	% of Annual Target
<b>Combined Sewer Area</b>							
Catch Basins Cleaned CSO Area - PM	6,741	6,015	5,943	5,175	23,874	4,460	29%
CSO Inspections	1,790	1,239	1,301	1,235	5,565	1,272	24%
<b>Sanitary Sewer Area</b>							
Catch Basins Cleaned SSO Area - PM	1,397	45	188	2,659	4,289	1,144	58%
<b>County Wide</b>							
Sewer Main Inspections MSD Crews (LF)	184,384	166,228	33,463	13,523	397,598	198,000	2%
Sewer Main Inspections Contractor (LF)	141,872	272,606	186,018	129,759	730,255	198,000	16%
Total Inspections (LF)	326,256	438,834	219,480	143,282	1,127,853	396,000	9%

Rolling quarterly GLPM performance is related to unplanned maintenance; therefore no targets have been developed.

Rolling Quarterly GLPM Performance					
	Oct-Dec	Jan-Mar	Apr-Jun	Jul-Sep	Total
<b>Combined Sewer Area</b>					
Catch Basins Cleaned CSO Area - UM	500	194	319	363	1,376
CSO Debris Removal WO	168	78	169	146	561
Chemical Root Treatment CSO Area (LF)	0	0	0	0	0
Root Cutting CSO Area (LF)	740	475	1,804	1,855	4,874
Flushing and Cleaning of Sewer Mains CSO Area (LF)	4,822	5,798	7,112	4,837	22,568
<b>Sanitary Sewer Area</b>					
Catch Basins Cleaned SSO Area - UM	71	42	105	95	313
Chemical Root Treatment SSO Area (LF)	48,803	178,302	49,808	0	276,913
Root Cutting SSO Area (LF)	24,253	15,057	19,004	7,892	66,207
Flushing and Cleaning of Sewer Mains SSO Area (LF)	53,352	23,000	30,170	39,361	145,883

## 6.6 Water Quality Treatment Center Bypasses

### 6.6.1 Bypass Events

The table below summarizes the bypasses that occurred during this reporting period.

### 6.6.2 Bypass Corrective Actions

Each quarter, an assessment of bypasses is conducted to determine the root cause of the bypass, the failure category, corrective actions to be taken, possible programmatic solutions, and corrective action completion date. Refer to the table below for causes of bypasses and respective corrective actions that occurred July 1, 2015 through September 30, 2015.

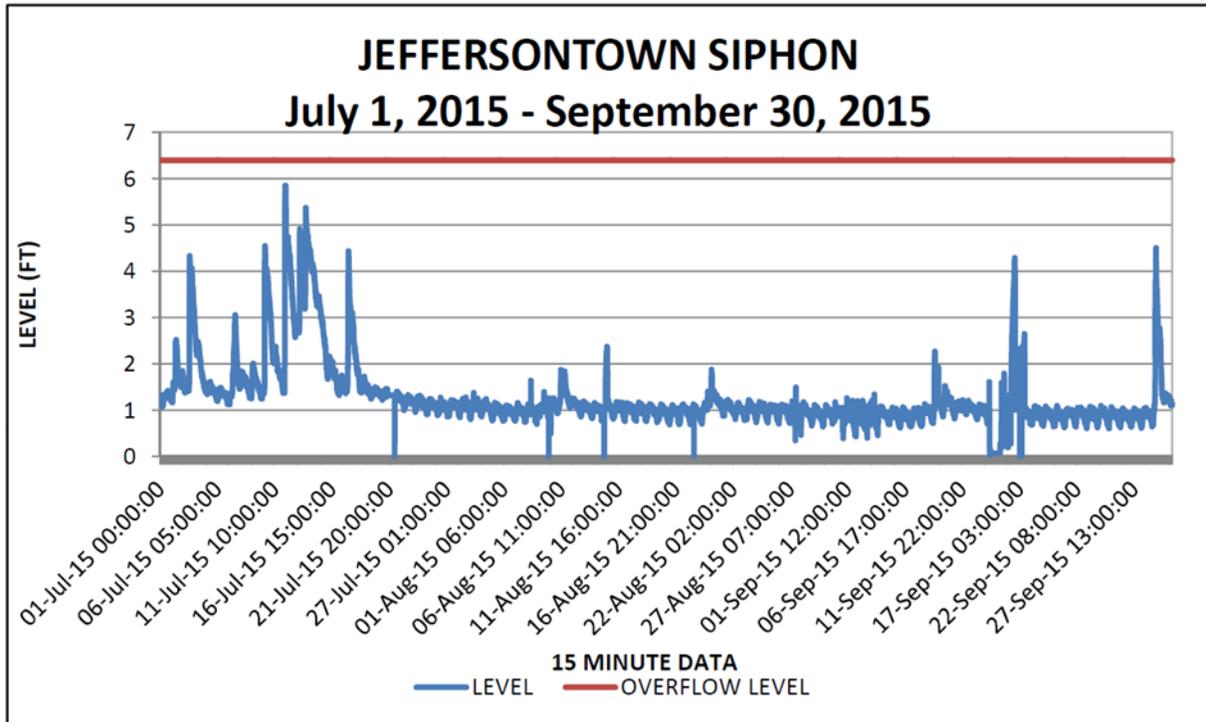

Bypass Summary - July 1, 2015 to September 30, 2015					
DATE	WQTC	WORK ORDER	FAILURE CODE	BYPASS DESCRIPTION	FAILURE RESOLUTION
<b>Capacity (CAP)</b>					
July 12, 2015	HUNTING CREEK NORTH	2387500	CAP	An extremely heavy rain event caused the water quality treatment center to become overwhelmed. All concrete plant process structures were underwater. MSD staff were unable to determine the exact volume bypassed. Prior to the plant flood, the influent flow rate was 782 gpm. The design flow of the plant is 0.358 MG. The gallons of raw wastewater reaching the waters of the U.S. cannot be accurately calculated as the WQTC was completely underwater.	This plant is scheduled to come off line in 2015.
July 12, 2015	HITE CREEK	2387485	CAP	An extremely heavy rain event caused the influent pump station to become overwhelmed with storm water. The bypassed raw wastewater reaching the waters of the U.S. is estimated at 157,500 gallons because it cannot be accurately calculated as the splitter box for the influent pump station was under water. The flow into the plant at the time of occurrence was 15 MGD, which is metered after the influent pumps.	Construction to increase the hydraulic loading for this plant is currently underway.
July 12, 2015	BERRYTOWN	2387497	CAP	On July 12, 2015, Berrytown WQTC bypassed disinfection and dechlorination treatment. Because of elevated levels in the aeration tank, approximately 38,000 gallons was bypassed. As a precaution we turned off plant aeration to minimize the loss of biosolids. The design flow at Berrytown WQTC is 0.075 MG. We are unable to determine the exact flow rate at the time of bypass because the plant flow meter was maxed at a rate of 0.430 MGD.	Plant is to be eliminated December 2015.
July 14, 2015	HITE CREEK	2388696	CAP	An extremely heavy rain event caused the influent pump station to become overwhelmed with storm water. The bypassed raw wastewater reaching the waters of the U.S. is estimated at 49,000 gallons because it cannot be accurately calculated as the splitter box for the influent pump station was under water. The flow into the plant at the time of occurrence was 15 MGD, which is metered after the influent pumps.	Construction to increase the hydraulic loading for this plant is currently underway.
July 14, 2015	BERRYTOWN	2389577	CAP	On July 14, 2015, Berrytown WQTC bypassed disinfection and dechlorination treatment. Because of elevated levels in the aeration tank, approximately 1,425 gallons was bypassed. As a precaution we turned off plant aeration to minimize the loss of biosolids. The design flow at Berrytown WQTC is 0.075 MG. We are unable to determine the exact flow rate at the time of bypass because the plant flow meter was maxed at a rate of 0.430 MGD.	If operational needs for resources allow, in the event of heavy rain, MSD will haul water from the plant. Plant is to be eliminated in 2015. Disinfected and cleaned by MSD staff.
<b>Human Error (OPN)</b>					
July 12, 2015	CEDAR CREEK	2387653	OPN	On July 13, 2015, MSD submitted a bypass letter that stated the cause of the July 12, 2015 Cedar Creek WQTC bypass was caused by algae on the tertiary relief gate level transducer. Following the bypass event, as a result of an investigation, it was determined that the cause of the bypass was due to human error. Bypassed volume received full preliminary and secondary treatment. Peak plant flow rate during time of bypass was 15.853 MGD. Approximately 1,000 gallons was bypassed. The design flow at Cedar Creek WQTC is 7.5 MG. Plant flow rate during the duration of the bypass was 0.109 MGD.	MSD re-trained staff on Standard Operating Procedure September 18 & 19, 2015.
September 26, 2015	HITE CREEK	2434538	OPN	At approximately 10:59 pm on September 26, the breaker for the UV 3000+ system at Hite Creek tripped. The back up UV 3000 system started as programmed. However, the influent gate to the UV 3000+ stayed open due to the tripped breaker, which allowed approximately 49,074 gallons of fully treated, but not disinfected, wastewater to reach the waters of the U.S.	MSD contractor performed a permanent repair and installed new wires and conduit on September 28, 2015. On September 17, 2015, a contractor damaged the electric line feeding the UV 3000+ system. The contractor performed a temporary repair on the electric line. We believe the electric line shorted to ground and caused the breaker to trip and enabled the UV influent gate to stay in the open position.
<b>Facility Failure ( Mechanical - MCH, Electrical - ELE, Structural - SRT)</b>					
N/A	N/A	N/A	N/A	No bypasses of this category occurred during the reporting period.	N/A
<b>External Power failures (LGE Related-PWR)</b>					
July 18, 2015	MCNEELY LAKE	2391494	PWR	On Saturday, July 18, 2015, this plant experienced a power outage after the main feed line coming to the plant grounded and caught fire. MSD personnel install a portable generator. As a result approximately 8,000 gallons of raw sewage overflowed from the influent wet well and bypassed all treatment processes.	Plant is to be eliminated in 2015. MSD personnel cleaned and sanitized area.
<b>Utility Damage</b>					
N/A	N/A	N/A	N/A	No bypasses of this category occurred during the reporting period.	N/A

### **6.6.3 Jeffersontown Water Quality Treatment Center**

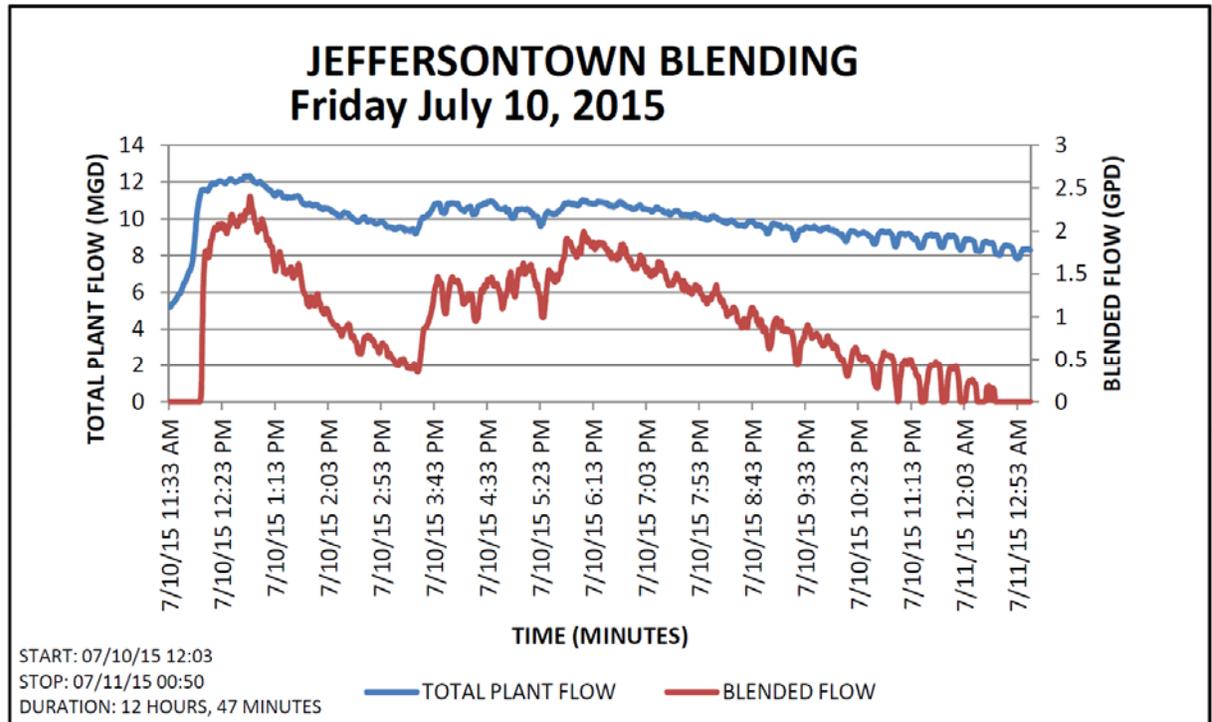

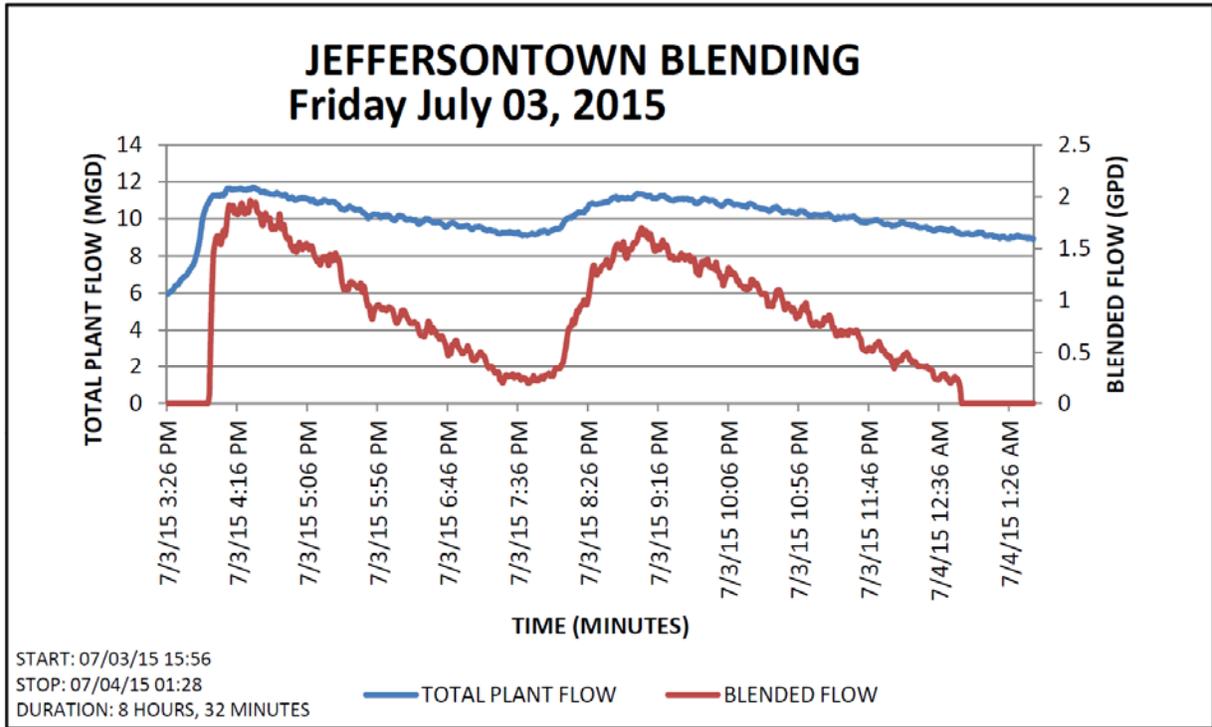

MSD submitted a Jeffersontown WQTC Process Control Plan on October 31, 2008, as required by paragraph 26.a of the Amended Consent Decree. MSD received comments on December 12, 2008, and resubmitted the plan January 16, 2009, and again on February 20, 2009. MSD received conditional approval of this document from EPA on April 1, 2009, pending finalization of the Amended Consent Decree that was under consideration by the Federal Court at the time the Process Control Plan was submitted. The Process Control Plan was accepted by the Federal Court and incorporated by reference into the Amended Consent Decree by an Order signed February 12, 2010, that was entered into public record February 15, 2010.

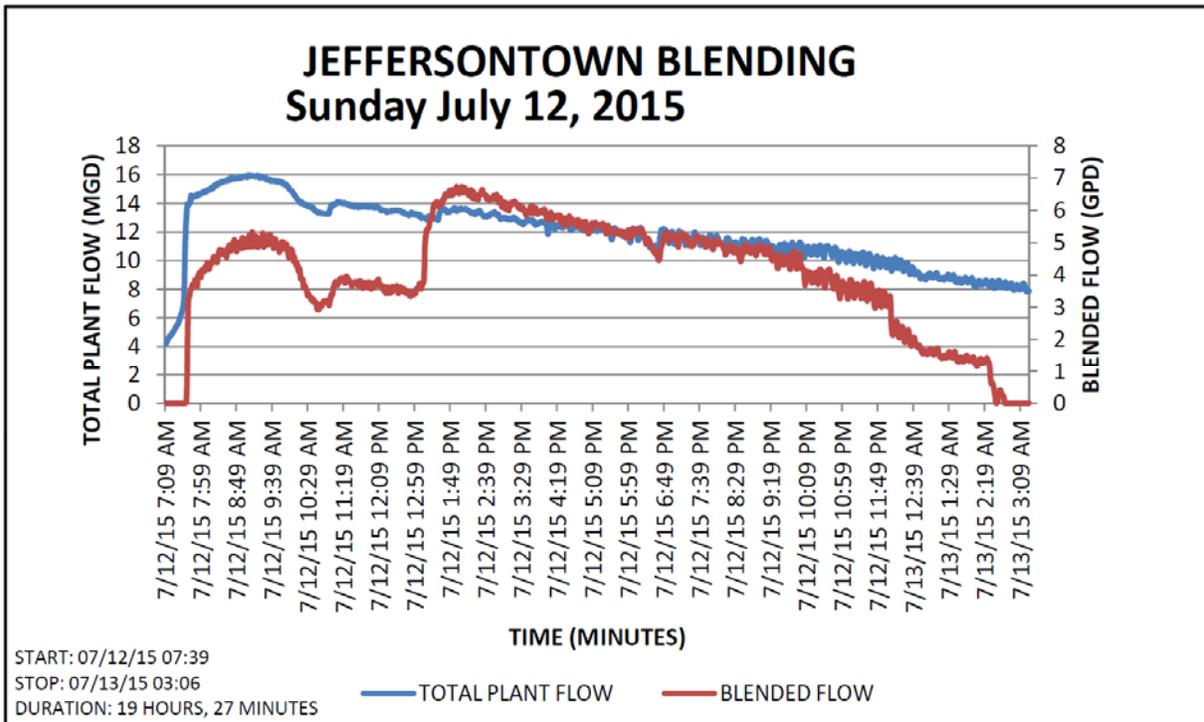

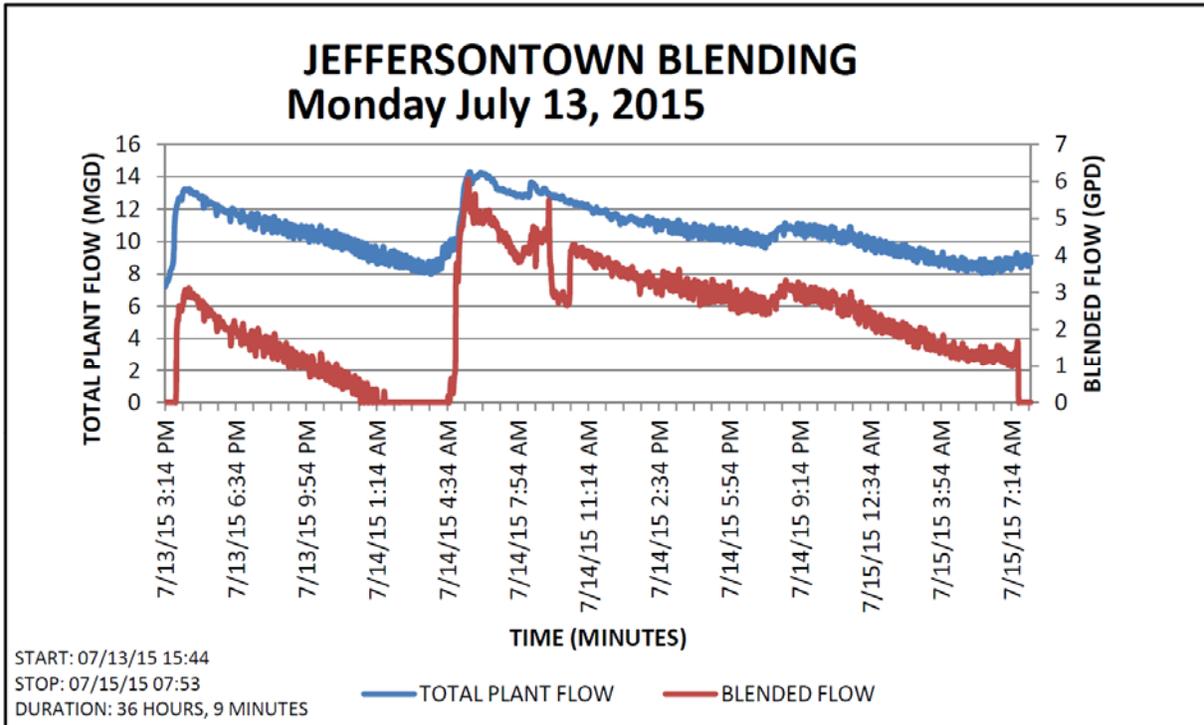

The following activities occurred at the Jeffersontown WQTC during the reporting period:

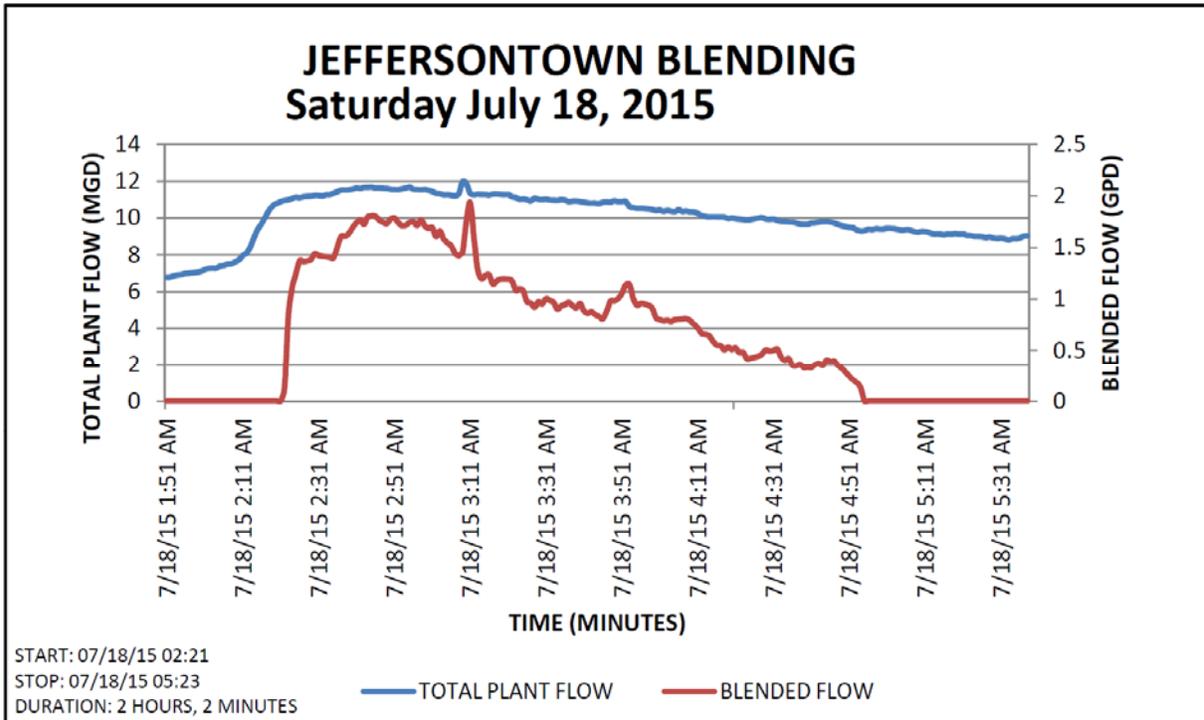

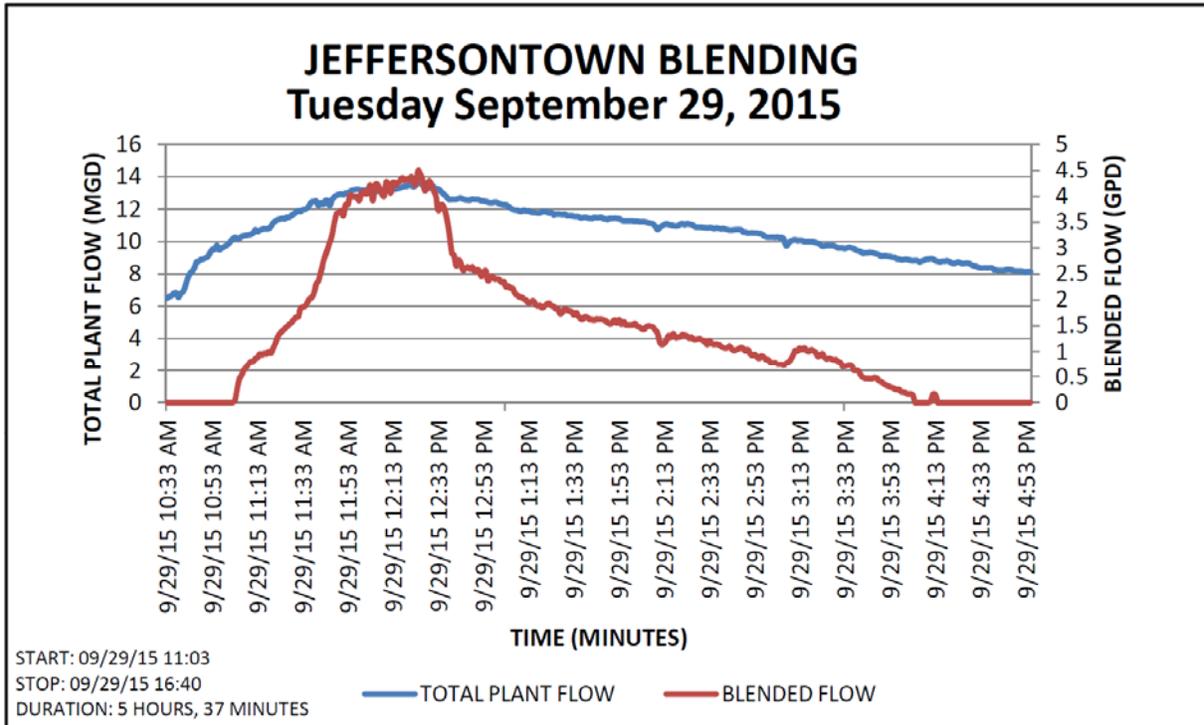

- Inspections were conducted upstream of the Jeffersontown WQTC Headworks six times. Refer to Section 2 for SSO Route information. Overflows were reported up stream of the siphon at manhole 28173 one time, July 12, 2015.

- There were six blending events during the reporting period. Below are charts for each blending event that show total plant flow during the blending event.

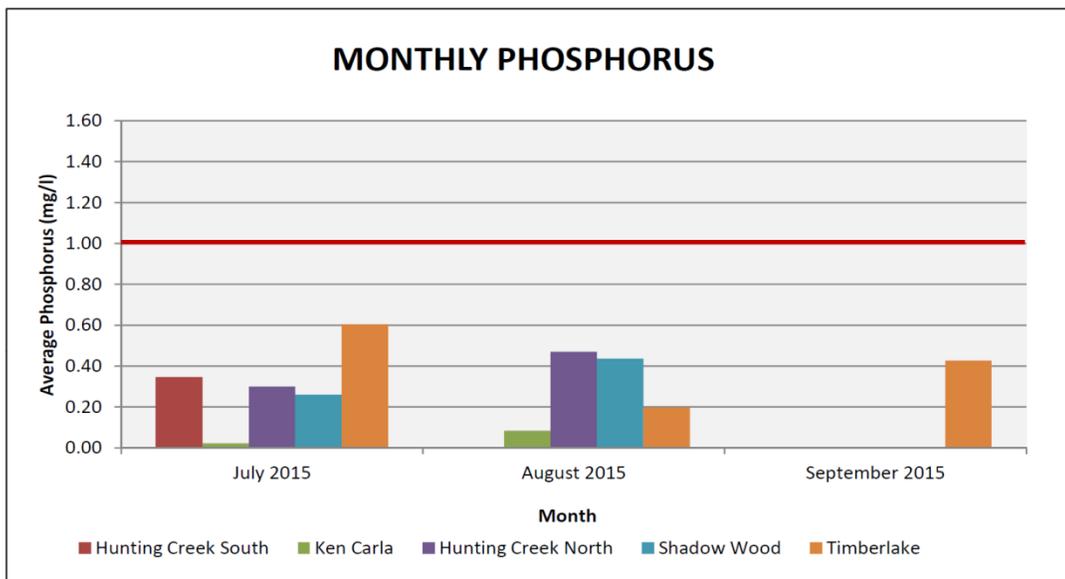

### 6.7 Phosphorus Monitoring at the Prospect WQTCs

As part of the Amended Consent Decree, MSD has agreed to submit phosphorus monitoring data including the calculations of monthly averages with the quarterly reports. Prospect WQTCs were under the 1mg/l limit during the reporting period, per the Amended Consent Decree requirement. During the quarter, flow was diverted to the Harrods Creek Pump Station for each of the WQTCs. This will be the last Quarterly Report that includes a Phosphorus Monitoring summary per the Amended Consent Decree as these WQTCs were removed from service during this reporting period. The following chart displays monthly average phosphorus results for the Prospect WQTCs.

Note:  
\*R denotes events that were retained by the Sneads Branch Inflatable Dam and therefore did not reach the Waters of the US.  
\* denotes CSOs that are a part of the Sneads Branch Inflatable Dam Sewershed

Appendix C – Acronyms

## Appendix C - Acronyms for Project WIN Quarterly Report

AAM	Advanced Asset Management
AAOV	Annual Average Overflow Volume
ADAPS	Automated Data Processing System
BGC	Beargrass Creek
BMP	Best Management Practices
CCP	Composite Correction Plan
CD	Consent Decree
CMF	Central Maintenance Facility
CMMS	Computerized Maintenance Management System
CMOM	Capacity Management Operations and Maintenance
CPE	Comprehensive Performance Evaluations
CSO	Combined Sewer Overflow
CSS	Combined Sewer System
CSSA	Continuing Sewer System Assessment
DAP	Discharge Abatement Plan (DAP)
DMR	Discharge Monitoring Report
eB	Enterprise Bridge (Spescom scanning software for document management)
EMC	Event Mean Concentration
EPA	Environmental Protection Agency
ERP	Enforcement Response Plan
FM	Force Main
FOG	Fats, Oil & Grease
FPS	Flood Pump Station
FSE	Food Service Establishment
FY	Fiscal Year
GCE	Grease Control Equipment
GIS	Geographical Information System
GLPM	Gravity Line Preventive Maintenance
HMI	Human Machine Interface
I&FP	Infrastructure & Flood Protection (MSD Division)
ICA	Interceptor Condition Assessment
ID	Identification
I&I	Inflow and Infiltration
IMS	Information Management System
IOAP	Integrated Overflow Abatement Plan
ISSDP	Interim Sanitary Sewer Discharge Plan
IT	Information Technology
IWD	Industrial Waste Department
JCPS	Jefferson County Public Schools
KDEP	Kentucky Department of Environmental Protection
KPDES	Kentucky Pollutant Discharge Elimination System
KY	Kentucky
LE	Lateral Extension
LID	Low Impact Development
LIMS	Laboratory Information Management System
LTC	Long Term Control
LTCP	Long Term Control Plan
LOJIC	Louisville and Jefferson County Information Consortium
MDS	Main Diversion Structure
MEB	Main Equipment Building

## Appendix C - Acronyms for Project WIN Quarterly Report

MFWTP	Morris Forman Wastewater Treatment Plant
MG	Million Gallons
MGD	Million Gallons Per Day
MLK	Martin Luther King
MO	Metro Operations
MOA	Memorandum of Agreement
MOR	Monthly Operating Report
MOU	Memorandum of Understanding
MSD	Metropolitan Sewer District (Louisville and Jefferson County)
NDD	Non-Domestic Dischargers
NMC	Nine Minimum Controls
NPR	National Public Radio
ORSANCO	Ohio River Valley Water Sanitation Commission
PACP	Pipeline Assessment and Certification Program
PCM	Post Construction Monitoring
PI	Plant Information System
PM	Preventive Maintenance
POC	Pollutants of Concern
PP	Pumping Package
PS	Pump Station
PSC	Property Service Connection
RDII	Rainfall-Derived Infiltration and Inflow
RS	Regulatory Services
RTC	Real Time Control
SCADA	Supervisory Control And Data Acquisition
SCAP	System Capacity Assurance Plan
SIU	Significant Industrial User
SOP	Standard Operating Procedure
SORP	Sewer Overflow Response Protocol
SSDP	Sanitary Sewer Discharge Plan
SSES	Sanitary Sewer Evaluation Study
SSO	Sanitary Sewer Overflow
SSOP	Sanitary Sewer Overflow Plan
SWOR2	Southwestern Outfall Relief - Phase 2
SWPS	Southwestern Pump Station
TM	Technical Memorandum
TMDL	Total Maximum Daily Load
TV	Television
UIM	Utility Information Management
UK	University of Kentucky
USACE	US Army Corps of Engineers
USF&W	United States Fish and Wildlife
USGS	United States Geological Survey
WDR	Wastewater Discharge Regulators
WIN	Waterway Improvements Now
WQT	Water Quality Tool
WQTC	Water Quality Treatment Center
WW	Wet Weather
WWT	Wet Weather Team
