FIRST MAILING

**Be part of the solution for safe, clean waterways!**  
**Have your sump pump inspected for free.**

Dear FIRST MAILING:

MSD is committed to providing safe, clean waterways for our community. One way that we accomplish that goal is by eliminating leaks or overflows from the sanitary sewer system.

Some homes in your area may have a sump pump or downspouts that release clean water into the sewer system, which can cause sewage to overflow onto the ground and into local waterways and may even contribute to a sanitary sewer backup into your home. Instead, these sources should discharge that clean rainwater onto the ground, saving space inside the sewer pipe for sewage and reducing your chance of a sanitary sewer backup.

MSD is required by our Consent Decree to reduce sanitary sewer overflows throughout our community. Part of this effort involves addressing illicit stormwater connections to the sewer, including inspecting and removing sump pump or other potential stormwater connections from your property. This inspection is at no cost to you. If your sump pump discharges to the sewer system, we will cover repair costs through MSD's Plumbing Modification Program. If your scheduled inspection shows that stormwater is properly discharging to your yard, nothing further needs to be done.

**Call MSD at 502-540-6600 within 30 days to arrange your FREE sump pump inspection and avoid an additional \$75 per month fee on your bill.**

**For more information, visit [LouisvilleMSD.org/PlumbingModification](http://LouisvilleMSD.org/PlumbingModification)**

Sincerely,

Vikki Huelsman  
Plumbing Modification Program Administrator

PAULA GAGLIARDI  
8203 SIESTA WAY  
LOUISVILLE KY 40219

**Be part of the solution for safe, clean waterways!**  
**Have your sump pump inspected for free.**

Dear PAULA GAGLIARDI:

MSD is committed to providing safe, clean waterways for our community. One way that we accomplish that goal is by eliminating leaks or overflows from the sanitary sewer system.

Some homes in your area may have a sump pump or downspouts that release clean water into the sewer system, which can cause sewage to overflow onto the ground and into local waterways and may even contribute to a sanitary sewer backup into your home. Instead, these sources should discharge that clean rainwater onto the ground, saving space inside the sewer pipe for sewage and reducing your chance of a sanitary sewer backup.

MSD is required by our Consent Decree to reduce sanitary sewer overflows throughout our community. Part of this effort involves addressing illicit stormwater connections to the sewer, including inspecting and removing sump pump or other potential stormwater connections from your property. This inspection is at no cost to you. If your sump pump discharges to the sewer system, we will cover repair costs through MSD's Plumbing Modification Program. If your scheduled inspection shows that stormwater is properly discharging to your yard, nothing further needs to be done.

**Call MSD at 502-540-6600 within 30 days to arrange your FREE sump pump inspection and avoid an additional \$75 per month fee on your bill.**

**For more information, visit [LouisvilleMSD.org/PlumbingModification](https://LouisvilleMSD.org/PlumbingModification)**

Sincerely,

*Vikki Huelsman*

THOMAS & MONICA LOESER  
8313 SIESTA WAY  
LOUISVILLE KY 40219

**Be part of the solution for safe, clean waterways!**  
**Have your sump pump inspected for free.**

Dear THOMAS & MONICA LOESER:

MSD is committed to providing safe, clean waterways for our community. One way that we accomplish that goal is by eliminating leaks or overflows from the sanitary sewer system.

Some homes in your area may have a sump pump or downspouts that release clean water into the sewer system, which can cause sewage to overflow onto the ground and into local waterways and may even contribute to a sanitary sewer backup into your home. Instead, these sources should discharge that clean rainwater onto the ground, saving space inside the sewer pipe for sewage and reducing your chance of a sanitary sewer backup.

MSD is required by our Consent Decree to reduce sanitary sewer overflows throughout our community. Part of this effort involves addressing illicit stormwater connections to the sewer, including inspecting and removing sump pump or other potential stormwater connections from your property. This inspection is at no cost to you. If your sump pump discharges to the sewer system, we will cover repair costs through MSD's Plumbing Modification Program. If your scheduled inspection shows that stormwater is properly discharging to your yard, nothing further needs to be done.

**Call MSD at 502-540-6600 within 30 days to arrange your FREE sump pump inspection and avoid an additional \$75 per month fee on your bill.**
