Louisville, KY 40203

Be part of the solution for safe, clean waterways.

Is your sump pump discharging
into the sanitary sewer system?

Call **502.540.6600**,
for a free inspection
and free solution.

Be part of the solution for safe, clean waterways.

Did you know some homes in your area may have a sump pump that releases clean water into the sewer system, which can cause sewage to overflow onto the ground and into local creeks and streams.

Sump pumps should discharge that clean rainwater onto the ground, saving space inside the sewer pipe for sewage.

Be part of the solution!

MSD inspectors can look at your sump pump and determine if it discharges correctly. If not, we will fix it at **no cost** to you.

Please call **502.540.6600** to arrange an appointment.
