Project WIN (Waterway Improvements Now) Public Meetings Announcement

MSD Will Be In Your Neighborhood - We Need Your Input!

As part of our Consent Decree Obligations, MSD must seek public input into the development of the community's plan for minimizing combined sewer overflows and mitigating sanitary sewer overflows. The second round of meetings designed for this purpose are currently underway. The purpose of these meetings is to get early feedback from residents on specific problems and potential opportunities for projects in their areas. Map boards will be on display and staff will be available after the presentation to talk one-on-one with residents. Public input is highly valuable as part of the planning process. Be a part of a **WIN**ning team and help keep our waterways clean.

****A light dinner will be served during the meeting****One Rain Barrel as well as other prizes will be raffled at each meeting****
