September 27, 2011

MSD is currently required to eliminate 5 Existing Treatment Plants by the end of 2015.

The elimination of these five plants will result in improved water quality in the Prospect Area and Harrods Creek Watersheds.

The 5 Existing WWTPs

- Hunting Creek North (built 1964, acquired 1999)
- Hunting Creek South (built 1968, acquired 1999)
- Timberlake (built 1973, acquired 1999)
- Ken Carla (built 1968, acquired 1973)
- Shadow Wood (built 1979, acquired 2008)

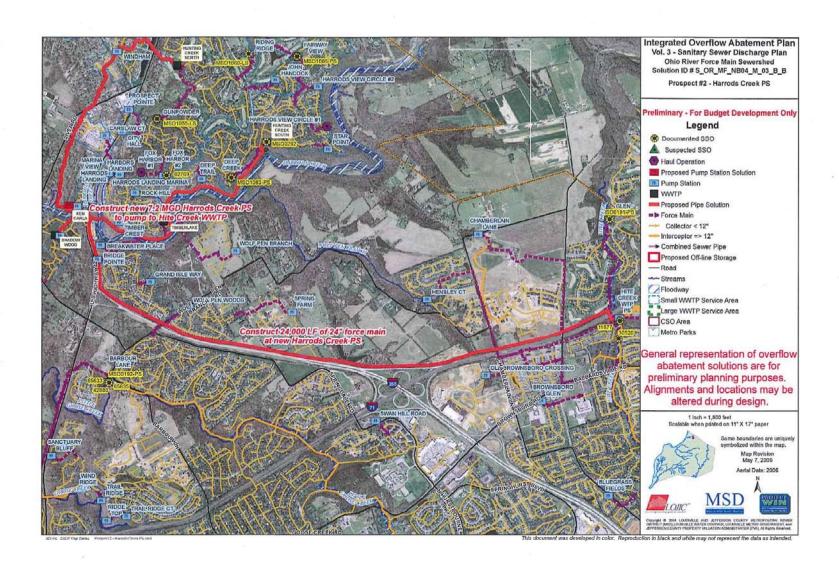

MSD's Amended Consent Decree: Prospect WWTP Eliminations – Critical Dates

- March 31, 2009 MSD required to submit a plan to EPA summarizing a selected option for the elimination of the (5) existing package plants in the Prospect area.
- June 10, 2009 MSD was granted a wasteload allocation allowing for the expansion of the MSD Hite Creek Water Quality Treatment Center from 6.0 MGD to 8.8 MGD in anticipation of the increased flows from Prospect.
- September 2009 EPA formal approval of the Elimination Plan.
